

VMware Fusion 2

Windows is even better on the Mac.

AT A GLANCE

Get the best of both Mac and PC worlds with VMware Fusion 2. Seamlessly run your favorite Windows applications and devices on the Mac.

BENEFITS

- Run your favorite Windows applications on your Intel Mac, without rebooting.
- Easily share data between your Mac and PC.
- Switch to the Mac with ease, bringing along all your applications, devices and even your old PC.
- Graduate from Boot Camp by running Windows and Mac at the same time. No more rebooting to access Windows apps on a Mac.

Get the best of both worlds with VMware Fusion 2.

Who Knew They Could Play Nice?

Get the best of both Mac and PC worlds with VMware Fusion 2. Seamlessly run your favorite Windows applications and devices on the Mac. Built from the ground up for the Mac, VMware Fusion is the easiest way to switch from PC to Mac—letting you bring all your Windows applications with you and make the most of your Windows software investment. It's the perfect safety blanket for the switch.

The winner of more than a dozen industry awards, VMware Fusion gives you the power of more than a decade of technology excellence, along with the user-friendly experience you expect from the Mac. With VMware Fusion, Windows really is better on the Mac.

Who Says You Can't Have it All?

Break Down the Walls Between Mac and PC

VMware Fusion transforms Windows applications to work seamlessly like native OS X applications. Now you can share data back and forth between Windows and Mac using Shared Folders; drag and drop files, and even copy and paste styled text. Instantly launch Windows applications from any Mac file, the Dock, Spotlight and more. Minimize Windows applications to the Dock and quickly switch between Windows and Mac applications using Exposé.

The Safest Way to Run Windows on Your Mac

VMware Fusion makes your Windows-on-Mac experience safe and reliable, with great features like AutoProtect automated snapshots and a complimentary 12-month subscription to McAfee VirusScan Plus.

Switching is a Snap

Moving to VMware Fusion has never been easier. Windows Easy Install gets you up and running in a couple of clicks. Plus, importing non-VMware virtual machines is as easy as point-and-click.

For current Boot Camp users, you can run VMware Fusion right on top of your existing Boot Camp partition. And when you're ready, just import your Boot Camp partition and reclaim unused space.

Powerful Technology. Friendly Face.

Built from the ground up for Mac users—and with an obsessive eye toward being a good “Mac citizen”—VMware Fusion is the easiest, most Mac-friendly way to run Windows on the Mac. A Mac-first user interface guarantees the features you expect, like searchable Apple help, Boot Camp support, Quick Look integration and more.

All your favorite Windows apps, now available on the Mac.

Who Needs VMware Fusion 2?

Switcher's Best Friend

With VMware Fusion, switching to the Mac is easy and painless. Bring all your Windows applications and devices with you and get the most out of your software investment. Even bring your entire Windows PC along with—virtually—thanks to free tools like VMware Converter.

Macs Get Down to Business with VMware Fusion

Put your Mac to work with Windows-only business-critical applications like Microsoft Outlook, Project, Visio, Access, AutoCAD, Blackberries and thousands more.

Head of the Class

With VMware Fusion, it's easy to be a big Mac on campus. Now you can use specialty education applications that are typically Windows-only, on your Mac—everything from statistical packages, to textbook software and lab software.

On the Home Front

The Mac is right at home with VMware Fusion. Use Windows-only peripherals, personal finance applications, games, home entertainment applications and more, on your Mac with VMware Fusion.

A Techie's Delight

VMware Fusion is the most powerful virtualization solution for the Mac. Built on more than a decade's worth of virtualization technology, VMware Fusion provides industry-leading features like virtual machine snapshots, 4-CPU virtual machines, support for more than 60 guest operating systems, including Mac OS X Leopard Server, and access to more than 700 pre-built virtual appliances.

Key Features:

Unify Windows and Mac: Use VMware Fusion's Unity view to run Windows applications like Mac applications, quickly switching between Mac and Windows, and minimizing Windows applications to your Dock. Even store Windows applications in the Dock to launch at a moment's notice.

Virtual Video Star: VMware Fusion 2 raises the bar for 3D acceleration yet again, offering experimental support for DirectX 9.0 Shader Model 2. Enjoy the breadth of Windows gaming and 3D modeling applications on your Mac.

Mirrored Mirror, on your Mac: Access all your Mac files, straight from any Windows application. VMware Fusion's Mirrored Folders feature easily maps special folders on your Mac to their counterparts in your virtual machine.

Sharing is Caring: VMware Fusion Application Sharing lets you have the best of both worlds by setting your favorite applications—whether Windows or Mac—to run any file on your Mac or in Windows.

Set It and Forget It: Building on Multiple Snapshots, VMware Fusion's AutoProtect automatically snapshots your running virtual machine at set intervals, protecting you from unexpected bumps in the road. Viruses, spyware and other nasties don't give you fair warning to do a manual snapshot; AutoProtect means you still win.

Two Heads are Better Than One: Use VMware Fusion with as many displays as your Mac can handle. VMware Fusion offers the first true multi-display support for your Mac, with additional physical displays showing up as individual displays in your virtual machine.

Why Choose VMware Fusion?

With its superior power, flexibility, and pedigree, VMware Fusion is the right choice for anyone looking to get the most out of their Mac.

Proven: Winner of more than 200 awards for its industry-leading technology and with 4,000,000 users worldwide, VMware puts a Mac-friendly face on datacenter-proven virtualization.

Powerful: With unparalleled power-user features VMware Fusion is the most powerful way to run more than 60 operating systems on the Mac.

Mac-native: Built from the ground up for the Mac with a Cocoa-native user interface, VMware Fusion has the Mac-native features you expect.

Award-winning: In its first year on the market, VMware Fusion has won more than a dozen industry awards, including the coveted Macworld Editor's Choice award, PC World's Top 100 Products for 2008 and more.
