

VMware vSphere Consulting Services

Ensure a solid virtualization platform for your Cloud Infrastructure Initiatives with vSphere Consulting Services

AT A GLANCE

VMware vSphere Consulting services can help you:

- Build a robust virtualization foundation for your business.
- Accelerate the rollout and reduce the risk of moving to an IaaS environment.
- Deploy VMware vSphere, Enterprise Management and Security products using best practices, ensuring that you start with a sound infrastructure.
- Provide you with practical know-how through interactive workshops and stakeholder planning sessions.
- Leverage VMware and industry best practices, and the in-depth expertise of our consultants to deploy your vSphere platform infrastructure.

VMware vSphere® is the industry-leading virtualization platform for building cloud infrastructures. vSphere enables users to run business-critical applications with confidence and respond to their business faster. vSphere accelerates the shift to cloud computing for existing datacenters, while underpinning compatible public cloud offerings, paving the way to the only hybrid cloud model.

To fully leverage the VMware vSphere platform, start with an understanding of the features, functions and benefits of each component, the potential changes to your organization and a well-designed transition plan.

VMware vSphere Consulting Services help accelerate your journey to IT as a Service (IaaS) and cloud computing. Our expert vSphere consultants will help you expand your knowledge base around virtualization and cloud solutions, develop and design a comprehensive virtualization roadmap, leverage best practices for planning migrations, and help transform your Data Center environment to take advantage of the full benefits of virtualization and cloud computing. Our services are designed to accelerate your time to productivity and value – so that you can deliver results to the business sooner.

VMware vSphere Consulting Services Portfolio

VMware vSphere Jumpstart

vSphere Jumpstart facilitates the knowledge transfer and provides a hands-on opportunity to evaluate a non-production installation of the VMware vSphere solution guided by our VMware experts. Our consultants provide a proof of concept and knowledge transfer of vSphere by conducting a highly interactive workshop with your team. The workshop includes an in-depth discussion on vSphere criteria and next steps.

VMware Virtualization Assessment with ADM

The Virtualization Assessment with ADM highlights the virtualization opportunities for new and existing environments. Our virtualization experts determine the best server and application candidates for virtualization by assessing your environment on the potential savings of virtualization through a TCO/ROI analysis and analyzing capacity and reviewing application interdependencies.

VMware vSphere Plan and Design Service

Get the most out of your virtualization investment through the vSphere Plan and Design Service. Using your existing data, our vSphere consultants create a comprehensive, production-quality architecture design that considers the right balance of availability, performance, scalability, security, manageability, cost and compliance to meet your IT and business objectives.

VMware vSphere Healthcheck

You've made a significant investment to virtualize your computing environment and our VMware consultants can help you get the most from your investment. Working with your team, our VMware consultants analyze your unique environment, provide guidance on the current best practices for configuring and managing VMware vSphere and provide concrete, actionable recommendations to optimize your virtual infrastructure.

VMware ESX to ESXi Assessment and Migration Service

The ESX to ESXi Assessment and Migration Service helps accelerate your transition to the vSphere 5 environment. Our consultants conduct a knowledge transfer workshop on the functionality and methodology for migrating to ESXi, analyze the readiness of your environment and estimate the effort required to migrate from ESX to ESXi, the underlying infrastructure to vSphere 5.

VMware vSphere Upgrade

Combine ESX to ESXi Assessment and Migration Service with the vSphere Upgrade service to help transition your environment to vSphere 5. Leverage the best practices, knowledge and technical expertise from VMware consultants to advance the upgrade process and help mitigate the risk of transitioning to vSphere 5.
