

## VMware Certified Professional Program Logo Usage Guidelines

Printed versions of the VCP logo should be at least 5/16 of an inch (or 80 mm) high. The only currently permissible colors are black and white. The words "CERTIFIED" and "PROFESSIONAL" should be printed black on white; the word "VMware" should be white on black.

The logo should be printed with a margin of at least .15 inches (40mm) from the edge of a business card, and at least .5 inches (125mm) from the edge of stationery. The logo should not bleed off the edge of either a card or stationery.

Web versions of the logo should be 40 to 50 pixels high.

In any display, the logo should not overlap text or other logos.
