

ESX Server 2.0.2

# Updated RPMs and Security Fixes

Revised: 4/14/06

This release contains a number of updated RPMs and corrects a number of security issues in ESX Server. The following sections list those contents and the security alerts that are addressed:

- [RPMs Updated](#)
- [Security Alerts Addressed for the Console OS \(vmnix kernel\)](#)

## RPMs Updated

The following RPMs were updated in this release from the Red Hat Linux 7.2 versions to the Red Hat Enterprise Linux 2.1 AS versions. Because of this change in Red Hat release lines, you might notice some minor functional differences after the upgrade, particularly in software provided by RPMs that were down-reved (noted in bold in the following table). Be sure to test any customizations you make to these RPMs, or scripts run in the service console, after the upgrade.

RPM	RPM
anacron-2.3-17	dosfstools-2.7-1
at-3.1.8-24	e2fsprogs-1.26-1.72
authconfig-4.1.19.2-1	ed-0.2-21
