Three keys to a successful project

1. Self-service and virtual workflows and tasks in an over-saturated world
   - More than 80% of employees expect to complete more than 20 workflows and tasks in an day.
   - Remove access to personal devices

2. Delivering real-time notifications, and optimized workflows and tasks in an over-saturated world
   - More than 90% of employees expect to be notified about critical issues in real-time.

3. Single sign-on (SSO) experience and device enrollment and delivery
   - More than 95% of employees expect a seamless login experience across all devices.

Before You Start: The 3 Foundations of Success

1. A deep understanding of employees’ pain points
   - More than 90% of employees report that technology provides an opportunity to understand and address their pain points.

2. The right stakeholders
   - More than 80% of employees believe that IT and HR should work together to improve the digital experience.

3. A shared goal or measure of success
   - More than 90% of employees believe that IT and HR should have a shared goal in improving the digital experience.

Ready, Set, Go!

Once you’ve got the data, stakeholders, and goals in place, you’re ready put your plan into action.

Digital Employee Experience
3 keys to a successful project

In a recent global survey of employees, and HR and IT professionals over 6,000 respondents agreed: IT and HR need to rethink employee experience together.

Employee experience is comprised of three pillars:

- Culture
- Technology
- Physical

As you identify your first employee experience projects, and bring out the best in your employees.

Employee experience presents a great opportunity for organizations to differentiate themselves and take their business to the next level. The VMware Workspace ONE® digital workspace platform gives you the tools to make your organization’s next employee experience project a success.

Because technology contributes significantly to both culture and physical experiences, it plays a central role. For example, while a remote work program reflects company culture, it’s technology that provides the support to give workers what they need to be successful from anywhere. Similarly, part of what makes a great conference room (physical) experience is the ability to easily connect, share, and collaborate—supported by technology such as smart boards or the ability for a device to recognize when you are in the room and connect you to the presentation.

As the leading digital workspace provider, VMware Workspace ONE® can provide the foundation for your next employee experience initiative—enabling you to deliver consistent, engaging, and productive experiences across the entire employee lifecycle, from pre-hire to onboarding, to remote work (from home or during international travel), to lost or stolen devices, and even offboarding. Responsibility for many of these lifecycle moments spans multiple departments—so the right stakeholders need to rethink the employee experience together to improve the digital experience.
