

VMware Cloud Director Availability On-premises Guides

Guide #9

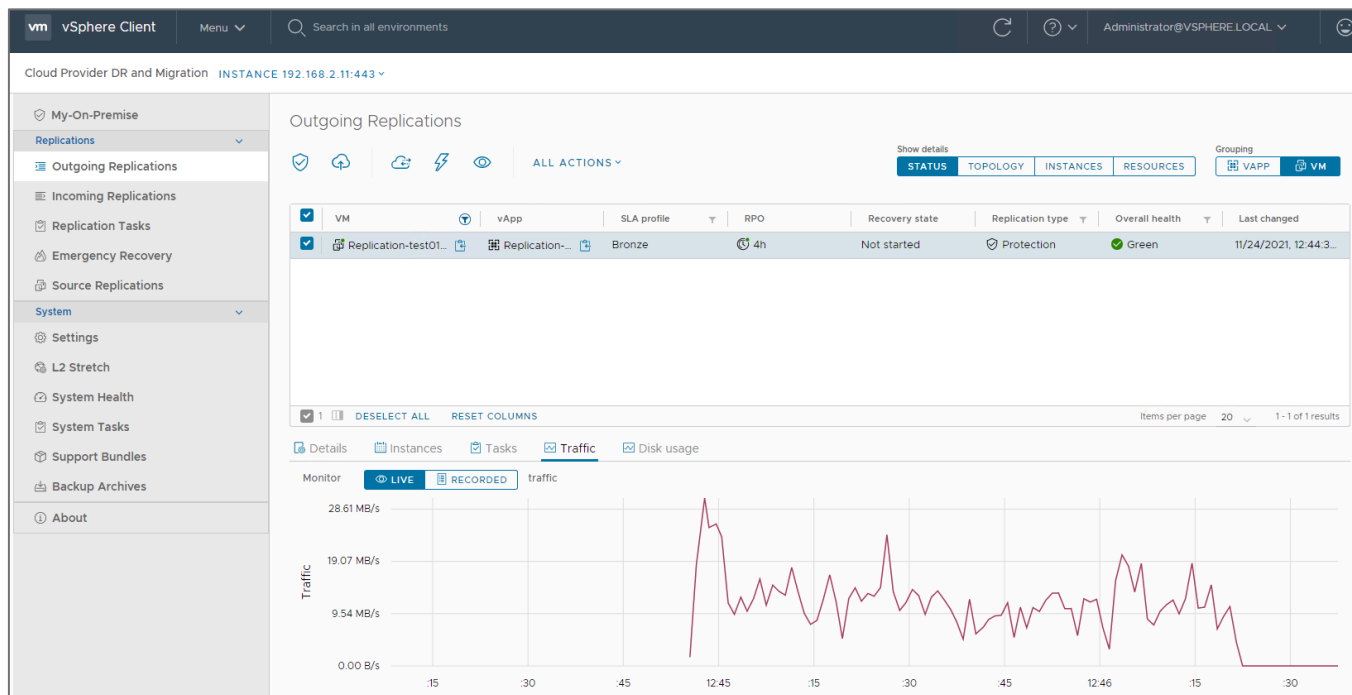

Evaluation of bandwidth utilization during the initial sync

You can find the most up-to-date technical documentation on the VMware website at: <https://docs.vmware.com/>

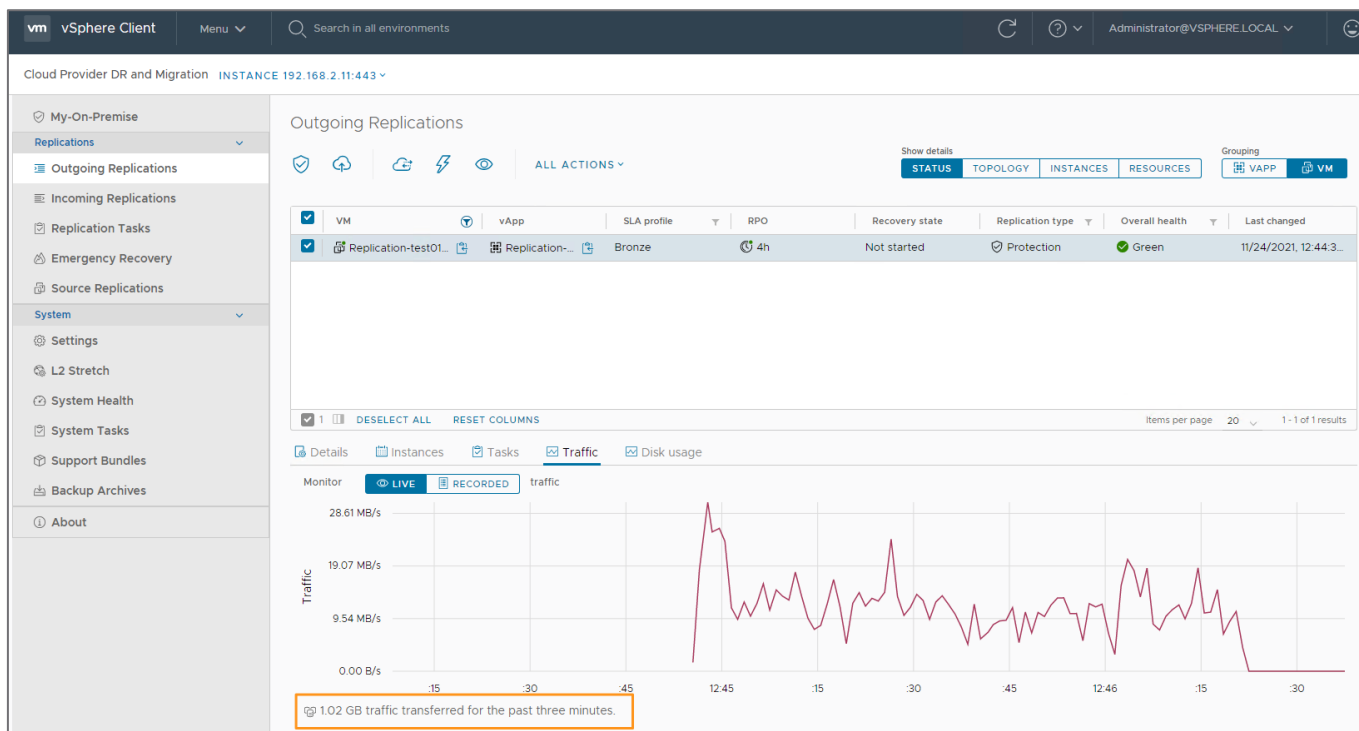

If you have comments about this documentation, submit your feedback to: vcav-light@vmware.com

During the initial synchronization of Incoming Replications and Outgoing Replications, see the VM replication data traffic.

1. To see the VM traffic, click the VM button, select a VM replication and in the bottom pane, click the Traffic tab.

2. To see the total traffic that is transferred for the selected replication, see the summary in the bottom.
