

# VMware Carbon Black Cloud Endpoint Standard Skills

## Exam Details (Last Updated: 2/21/2022)

The VMware Carbon Black Cloud Endpoint Standard Skills exam (5V0-93.22) which leads to VMware Carbon Black Cloud Endpoint Standard Skills badge is a 60 item exam, with a passing score of 300 using a scaled method. Candidates are given an appointment time of xxx minutes, which includes five-minute seating time and adequate time to complete the exam for non-native English speakers. Actual exam time is xxx minutes.

## Exam Delivery

This is a proctored exam delivered through Pearson VUE. For more information, visit the [Pearson VUE website](#).

## Certification Information

For details and a complete list of requirements and recommendations for attainment, please reference the [VMware Education Services – Certification website](#).

## Minimally Qualified Candidate

The minimally qualified candidate (MQC) should have attended the VMware Carbon Black Cloud Endpoint Standard course. The MQC should be a graduate of a cyber security degree or related program. The MQC should have 1 or more years of experience in an IT role. The MQC should have 1 or more years of experience in an IT security role. The MQC should be able to explain user, device, workload, and network security options. The MQC should be able to explain VMware Carbon Black security products, solutions, and architectures. The MQC should have knowledge of Windows, MacOS, and Linux operating systems. The MQC should possess knowledge of the objectives shown in the exam sections in this guide.

## Exam Sections

VMware exam blueprint sections are now standardized to the seven sections below, some of which may NOT be included in the final exam blueprint depending on the exam objectives.

Section 1 – Architecture and Technologies

Section 2 – Products and Solutions

Section 3 – Planning and Designing

Section 4 – Installing, Configuring, and Setup

Section 5 – Performance-tuning, Optimization, and Upgrades

Section 6 – Troubleshooting and Repairing

Section 7 – Administrative and Operational Tasks

If a section does not have testable objectives in this version of the exam, it will be noted below, accordingly. The objective numbering may be referenced in your score report at the end of your testing event for further preparation should a retake of the exam be necessary.

### Sections Included in this Exam

#### Section 1 - Architectures and Technologies

Objective 1.1 - Identify the architecture and data flows for Carbon Black Cloud endpoint Standard communication.

Objective 1.2 - Identify the functionality of sensor vs. cloud.

#### Section 2 - VMware Products and Solutions

Objective 2.1 - Identify the response capabilities available in the VMware Carbon Black Cloud.

Objective 2.2 - Identify the commands available within the Live Response features in the VMware Carbon Black Cloud.

Objective 2.3 - Identify the purpose of Reputation Priority.

Objective 2.4 - Identify the notification capabilities within the VMware Carbon Black Cloud.

Objective 2.5 - Identify the native integrations available within the VMware Carbon Black Cloud.

#### Section 3 - Planning and Designing

Objective 3.1 - Identify security benefits of using VMware Carbon Black Endpoint Standard.

Objective 3.2 - Identify use cases of VMware Carbon Black Endpoint Standard.

Objective 3.3 - Given organizational requirements, identify how to implement the Carbon Black Cloud Endpoint Standard policies to meet the requirements.

Objective 3.4 - Identify the impact of Reputation Priority on applications.

#### Section 4 - Installing, Configuring, and Setup

Objective 4.1 - Given organizational requirements, identify how to implement the Carbon Black Cloud Endpoint Standard rules to prevent and mitigate attacks.

Objective 4.2 - Given a set of rules, identify intended impacts on the endpoints.

Objective 4.3 - Given a set of rules, identify how to determine unintended impacts on the endpoints.

Objective 4.4 - Given a permission rule allowing execution, identify possible security risks.

Objective 4.5 - Given a blocking rule preventing execution, identify possible security risks.

Objective 4.6 - Given a scenario, identify the proper configuration of the local scanner.

Objective 4.7 - Given security requirements, identify the correct sensor policy configuration.

Section 5 – Not Applicable

Section 6 – Not Applicable

#### Section 7 Administrative and Operational Tasks

Objective 7.1 - Given a scenario about a suspicious behavior, identify how to perform a search across endpoint data.

Objective 7.2 - Given a scenario, identify how to respond to an alert.

Objective 7.3 - Given a scenario, identify the impact of a generated alert.

Objective 7.4 - Given a scenario, identify types of relevant information in an event.

Objective 7.5 - Given a security incident scenario, identify the first response that should be used within the VMware Carbon Black Cloud.

Objective 7.6 - Given a search, identify correct use of operators.

Objective 7.7 - Identify the functionality of Advanced Queries.

Objective 7.8 - Given a scenario, identify the proper Reputation override option.

Objective 7.9 - Identify where sensor status and sensor details exist.

Objective 7.10 - Given the scenario including the status of a sensor, identify the correct action for a sensor.
