

VMware Cloud Operations 8.x Professional

Exam Details (Last Updated: 08/25/2022)

The VMware Cloud Operations 8.x Professional (2V0-32.22) exam, which leads to VMware Certified Professional - Cloud Operations 2023 certification, is a 60-item exam with a passing score of 300 using a scaled method. Candidates are given an appointment time of 130 minutes, which includes adequate time to complete the exam for non-native English speakers. This exam may contain a variety of item types including single-selection multiple-choice, multiple-selection multiple-choice, matching, drag-and-drop, and hot area. Additional item types may be used but will appear less frequently than those previously mentioned.

Exam Delivery

This is a proctored exam delivered through Pearson VUE. For more information, visit the [Pearson VUE website](#).

Certification Information

For details and a complete list of requirements and recommendations for attainment, please reference the [VMware Education Services – Certification website](#).

Minimally Qualified Candidate

The minimally qualified candidate (MQC) has 6-12 months' hands-on experience installing, configuring, administering, and operating vRealize Operations and vRealize Log Insight. The candidate is typically an administrator who can perform vRealize Operations and vRealize Log Insight deployments. The candidate is also comfortable managing vRealize Operations and vRealize Log Insight environments using vRealize Suite Lifecycle Manager and troubleshooting both vRealize Operations and vRealize Log Insight solutions. Minimally Qualified Candidate should have all the knowledge contained in the exam sections listed below.

Exam Sections

VMware exam blueprint sections are now standardized to the seven sections below, some of which may NOT be included in the final exam blueprint depending on the exam objectives.

- Section 1 – Architecture and Technologies
- Section 2 – Products and Solutions
- Section 3 – Planning and Designing
- Section 4 – Installing, Configuring, and Setup
- Section 5 – Performance-tuning, Optimization, and Upgrades
- Section 6 – Troubleshooting and Repairing
- Section 7 – Administrative and Operational Tasks

If a section does not have testable objectives in this version of the exam, it will be noted below, accordingly. The objective numbering may be referenced in your score report at the end of your testing event for further preparation should a retake of the exam be necessary.

Sections Included in this Exam

Section 1 – Architecture and Technologies

Objective 1.1 – Differentiate between VMware Cloud Management offerings (SaaS vs On-Premises)

Objective 1.2 – Identify the features and capabilities of vRealize Suite Lifecycle Manager

Objective 1.3 – Identify the features and capabilities of vRealize Operations

Objective 1.4 – Identify the features and capabilities of vRealize Log Insight

Section 2 – VMware Products and Solutions

Objective 2.1 – Explain the components and integrations within a VMware Cloud Management solution

Objective 2.2 – Identify the role of the vRealize True Visibility Suite within a Cloud Operations solution

Objective 2.3 – Identify the use case for Skyline, Federated Analytics and vRealize AI Cloud

Objective 2.4 – Identify the use case for vRealize Suite Lifecycle Manager

Objective 2.5 – Identify the use case for vRealize Operations Remote Collectors, Cloud Proxies and Collector Groups

Objective 2.6 – Identify the use case for vRealize Log Insight and Log Insight Cloud

Section 3 – Planning and Designing

Objective 3.1 – Describe the different architectures for vRealize Operations (standalone vs. clustered, HA and Continuous Availability modes)

Objective 3.2 – Describe the different architectures for vRealize Log Insight (standalone vs. clustered)

Objective 3.3 – Size a vRealize Log Insight deployment based on a given scenario

Objective 3.4 – Size a vRealize Operations deployment based on a given scenario

Objective 3.5 – Identify the use case for vRealize Operations Remote Collectors, Cloud Proxies and Collector Groups

Section 4 – Installing, Configuring, and Setting Up

Objective 4.1 – Identify the pre-requisites for the installation (DNS, NTP, Service Accounts etc.)

Objective 4.2 – Identify the steps for deploying vRealize Suite Lifecycle Manager

Objective 4.3 – Identify the steps of manual installation of vRealize Operations (Standalone and Cluster)

Objective 4.4 – Identify the steps of installing vRealize Operations using vRealize Life Cycle Manager (Standalone, cluster)

Objective 4.5 – Identify the steps of manual installation of vRealize Log Insight (Standalone, cluster)

Objective 4.6 – Identify the steps of installing of vRealize Log Insight using vRealize Life Cycle Manager (Standalone, cluster)

Objective 4.7 – Configure identity and access management (RBAC) in vRealize Operations, vRealize LogInsight, vRealize Suite Lifecycle Manager

Objective 4.8 – Configure vRealize Suite Life Cycle Manger (extend storage, binary mapping, DNS, NTP, password, license store, identity, environment etc.)

Objective 4.9 – Configure data sources in vRealize Operations and vRealize Log Insight

Objective 4.10 – Install and configure management and content packs in vRealize Operations and vRealize Log Insight

Objective 4.11 – Describe setting up content management in vRealize Suite Lifecycle Manager

Objective 4.12 – Integrate vRealize Operations and vRealize Log Insight

Section 5 – Performance-tuning, Optimization, Upgrades -not applied to this exam

Section 6 – Troubleshooting and Repairing

Objective 6.1 – Identify how to generate log bundles (vRealize Operations, vRealize Log Insight and vRealize Suite Lifecycle Manager)

Objective 6.2 – Describe options for managing vRealize Operations cluster

Objective 6.3 – Describe options for managing vROps/ vRealize Log Insight admin and root passwords

Objective 6.4 – Describe options for changing the authentication provider in vRealize Suite Lifecycle Manager

Objective 6.5 – Troubleshoot common vRealize Log Insight Cluster performance and configuration issues

Objective 6.6 – Troubleshoot common vRealize Operations cluster performance and configuration issues

Objective 6.7 – Troubleshoot common vRealize Suite Lifecycle Manager performance and configuration issues

Section 7 – Administrative and Operational Tasks

Objective 7.1 – Identify the process for completing administrative day 2 tasks within vRealize Suite Lifecycle Manager

Objective 7.2 – Identify the process for completing operational day 2 environment tasks within vRealize Suite Lifecycle Manager

Objective 7.3 – Identify the process for completing operational day 2 content tasks within vRealize Suite Lifecycle Manager

Objective 7.4 – Manage Authentication and User Access Control

Objective 7.5 – Manage vRealize Operations Licensing and Licensing Groups

Objective 7.6 – Configure vRealize Operation Event Log Forwarding

Objective 7.7 – Apply patches or upgrades to vRealize Operations without vRealize Suite Lifecycle Manager
vRealize Operations

Objective 7.8 – Create and Manage vRealize Operations Custom Dashboards, Views, Reports & SuperMetrics

Objective 7.9 – Manage Alerts, Symptoms and Notifications

Objective 7.10 – Optimize the performance of a managed VMware Cloud environment

Objective 7.11 – Optimize the capacity of a managed VMware Cloud environment

Objective 7.12 – Plan a workload, infrastructure, or cloud migration

Objective 7.13 – Assess the cost of a managed VMware Cloud Environment

Objective 7.14 – Monitor Operating Systems and Applications

Objective 7.15 – Manage jobs with Automation Central vRealize Log Insight

Objective 7.16 – Manage authentication and access in vRealize Log Insight

- Objective 7.17 – Apply patches or upgrades to Log Insight without vRealize Suite Lifecycle Manager
- Objective 7.18 – Configure and manage vRealize Log Insight Agents
- Objective 7.19 – Configure and manage log forwarding, log masking and log filtering in vRealize Log Insight
- Objective 7.20 – Configure and manage retention and archiving settings for vRealize Log Insight
- Objective 7.21 – Configure and manage the system notifications for vRealize Log Insight
