

VMware Carbon Black Cloud Audit and Remediation Skills

Exam Details (Last Updated: 01/09/2020)

The VMware Carbon Black Cloud Audit and Remediation Skills exam (5V0-92.22) which leads to VMware Carbon Black Cloud Audit and Remediation Skills badge is a 53-item exam, with a passing score of 300 using a scaled method. Candidates are given an appointment time of 105 minutes.

Exam Delivery

This is a proctored exam delivered through Pearson VUE. For more information, visit the [Pearson VUE website](#).

Certification Information

For details and a complete list of requirements and recommendations for attainment, please reference the [VMware Education Services – Certification website](#).

Minimally Qualified Candidate

The minimally qualified candidate (MQC) should have attended the VMware Carbon Black Cloud Audit and Remediation course. The MQC should be a graduate of a cyber security degree or related program. The MQC should have 1 or more years of experience in an IT security role. The MQC should be able to explain user, device, workload, and network security options. The MQC should be able to explain VMware Carbon Black security products, solutions, and architectures. The MQC should have knowledge of Windows, MacOS, and Linux operating systems. The MQC should possess knowledge of the objectives shown in the exam sections in this guide.

Exam Sections

VMware exam blueprint sections are now standardized to the seven sections below, some of which may NOT be included in the final exam blueprint depending on the exam objectives.

- Section 1 – Architecture and Technologies
- Section 2 – Products and Solutions
- Section 3 – Planning and Designing
- Section 4 – Installing, Configuring, and Setup
- Section 5 – Performance-tuning, Optimization, and Upgrades
- Section 6 – Troubleshooting and Repairing
- Section 7 – Administrative and Operational Tasks

If a section does not have testable objectives in this version of the exam, it will be noted below, accordingly. The objective numbering may be referenced in your score report at the end of your testing event for further preparation should a retake of the exam be necessary.

Sections Included in this Exam

Section 1 –Architectures and Technologies

Objective 1.1 - Identify the architecture and data flows for VMware Carbon Black Cloud Audit and Remediation.

Objective 1.2 - Identify the communication flow between the sensor and the cloud.

Section 2 – VMware Products and Solutions – There are no testable objectives for this section.

Section 3 – Planning and Designing - There are no testable objectives for this section.

Section 4 – Installing, Configuring, and Setup

Objective 4.1 - Given a use case, identify the SQL query example that should be used. Objective 4.2 - Identify the options to export query results.

Objective 4.3 - Identify the options to retain query results. Objective 4.4 - Identify how to create queries in the console. Objective 4.5 - Identify how to retrieve query results.

Objective 4.6 - Identify options to view query results.

Section 5 – Performance-tuning, Optimization, Upgrades

Objective 5.1 - Identify the benefits of "where" clauses.

Section 6 – Troubleshooting and Repairing

Objective 6.1 - Identify why a query may fail.

Section 7 – Administrative and Operational Tasks

Objective 7.1 - Given a SQL query example, identify the use cases that is being discovered with the query.

Objective 7.2 - Identify how to run a query against one or more devices, policies, or operating systems.

Objective 7.3 - Given a scenario, identify the option that should be selected to run and schedule a query.

Objective 7.4 - Given a scenario, identify how to carry out threat hunting.

Objective 7.5 - Identify commands that are accessible with live response.

Objective 7.6 - Given a scenario, identify how to perform remote investigations.

Objective 7.7 - Given a scenario, identify the response actions available within the VMware Carbon Black Cloud Audit and Remediation.

Objective 7.8 - Given a scenario, identify how to remediate threats.
