

VMware SD-WAN Foundations

Exam Details (Last Updated: 01/09/2023)

The VMware SD-WAN Foundations exam (SV0-35.19) which leads to VMware SD-WAN Foundations Skills badge is a 47-item exam, with a passing score of 300 using a scaled method. Exam time is 100 minutes.

Exam Delivery

This is a proctored exam delivered through Pearson VUE. For more information, visit the [Pearson VUE website](#).

Certification Information

For details and a complete list of requirements and recommendations for attainment, please reference the [VMware Education Services – Certification website](#).

Minimally Qualified Candidate

The minimally qualified candidate should be familiar with WAN technologies and connectivity like MPLS, IPsec VPNs. They should have knowledge of Cloud Providers and Services for IaaS/PaaS/SaaS/XaaS, as well as Routing and Virtualization. Candidates should have completed all recommended training courses for this credential. The successful candidate will likely hold additional industry-recognized IT certifications or accreditations. The MOC should have all the knowledge contained in the exam sections listed below.

Exam Sections

If a section does not have testable objectives in this version of the exam, it will be noted below, accordingly. The objective numbering may be referenced in your score report at the end of your testing event for further preparation should a retake of the exam be necessary.

Section 1 –Architectures and Technologies

Section 1- Solution Architecture

Objective 1.1 Identify the ties of SD-WAN to Software Defined Networking.

Objective 1.2 Given a scenario, identify the use cases for using SD-WAN.

Objective 1.3 Identify the key pillars of VeloCloud Solutions.

Objective 1.4 Given a scenario, identify how VeloCloud Solution addresses the requirements.

Objective 1.5 Identify how components of the SD-WAN are used and how they work together.

Objective 1.6 Identify the characteristics of the Enterprise and Service Provider Architecture

Objective 1.7 Given a scenario, identify the features of SD-WAN that provide a solution to the need.

Objective 1.8 Given a description, identify the SD-WAN feature.

Objective 1.9 Given a description of an SD-WAN design, identify the type of design.

Section 2 Solution Validation

Objective 2.1 Given a scenario including bandwidth and feature requirements, identify the SD-WAN licensing requirements.

References

In addition to the recommended courses, item writers used the following references for information when writing exam questions. It is recommended that you study the reference content as you prepare to take the exam, in addition to the recommended training.
