Payment Card Industry (PCI)
Data Security Standard

Attestation of Compliance for
Onsite Assessments – Service Providers
Version 3.2.1
June 2018
INDEPENDENT ASSESSOR’S REPORT

We have examined VMware, Inc.’s (VMware’s) compliance with PCI Data Security Standard (PCI-DSS) v3.2.1 requirements for the SD-WAN platform with VMware logging and support features disabled as of March 31, 2022. Management of VMware is responsible for VMware’s compliance with the specified requirements. Our responsibility is to express an opinion on VMware’s compliance with the specified requirements based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether VMware complied, in all material respects, with the specified requirements referenced above. An examination involves performing procedures to obtain evidence about whether VMware complied with the specified requirements. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material noncompliance, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

Our examination does not provide a legal determination on VMware’s compliance with specified requirements.

In our opinion, VMware complied, in all material respects, with PCI Data Security Standard (PCI-DSS) v3.2.1 requirements as of March 31, 2022, for the SD-WAN platform with VMware logging and support features disabled.

This report is intended solely for the information and use of the management of VMware and customers of the SD-WAN platform that have their VMware logging and support features disabled, and is not intended to be and should not be used by anyone other than the specified parties.

Crowe LLP
South Bend, Indiana

Section 1: Assessment Information

Instructions for Submission

This Attestation of Compliance must be completed as a declaration of the results of the service provider’s assessment with the Payment Card Industry Data Security Standard Requirements and Security Assessment Procedures (PCI DSS). Complete all sections: The service provider is responsible for ensuring that each section is completed by the relevant parties, as applicable. Contact the requesting payment brand for reporting and submission procedures.

Provide a brief explanation why any checked services were not included in the assessment:

VMware provides a number of cloud services and products that support customer's CDE, a number of services are covered and reported on in other PCI assessments.

**Part 2b. Description of Payment Card Business**

Describe how and in what capacity your business stores, processes, and/or transmits cardholder data.

N/A – VMWare does not have any people, processes or technology that store, process, or transmit cardholder data or sensitive authentication data as part of the SD-WAN with VMware logging and support features disabled product architecture. As a result, VMware does not have a defined CDE. Associated requirements are considered the customer's responsibility with respect to their own CDE.

Describe how and in what capacity your business is otherwise involved in or has the ability to impact the security of cardholder data.

SD-WAN is the application of software-based network technologies that virtualize WAN connections. SD-WAN decouples network...
software services from underlying hardware to create a virtualized network overlay.

### Part 2c. Locations

List types of facilities (for example, retail outlets, corporate offices, data centers, call centers, etc.) and a summary of locations included in the PCI DSS review.

<table>
<thead>
<tr>
<th>Type of facility:</th>
<th>Number of facilities of this type</th>
<th>Location(s) of facility (city, country):</th>
</tr>
</thead>
<tbody>
<tr>
<td>Example: Retail outlets</td>
<td>3</td>
<td>Boston, MA, USA</td>
</tr>
</tbody>
</table>

Not Applicable - No physical locations are in scope for this assessment. All physical security related requirements are the responsibility of Amazon Web Services (AWS). AWS is considered a key PCI service provider to VMWare and is monitored for compliance per requirement 12.8.

### Part 2d. Payment Applications

Does the organization use one or more Payment Applications? □ Yes □ No

Provide the following information regarding the Payment Applications your organization uses:

<table>
<thead>
<tr>
<th>Payment Application Name</th>
<th>Version Number</th>
<th>Application Vendor</th>
<th>Is application PA-DSS Listed?</th>
<th>PA-DSS Listing Expiry date (if applicable)</th>
</tr>
</thead>

<td></td>
<td></td>
<td>□ Yes □ No</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>□ Yes □ No</td>
<td></td>
</tr>
</tbody>
</table>

### Part 2e. Description of Environment

Provide a **high-level** description of the environment covered by this assessment.

For example:
- Connections into and out of the cardholder data environment (CDE).

VMware provides cloud services to customers and it is the customers’ responsibility for encryption at rest, encryption in transit, and segmentation with regard to CHD within their own cloud environments. VMware does not have
- Critical system components within the CDE, such as POS devices, databases, web servers, etc., and any other necessary payment components, as applicable.

visibility to CHD in customer environments or capability of customer component modifications.

The scope of this report is limited to SD-WAN environments that have the support features that enables VMware staff to collect log information and packet capture files from customer environments disabled.

Any other VMware service/software are not within the scope of this report. In addition, the scope of this report is limited as follows:

Components in scope are limited to VeloCloud Orchestrator (VCO), VeloCloud Gateway (VCG), and management systems hosted in VMware controlled AWS environments. Point of Presence (PoP) or edge devices, and customer environments/CDEs are not the responsibility of VMware and are not in the scope of this report.

The SD-WAN management console has a support feature that enables VMware staff to collect log information and packet capture files from customer environments. The scope of this report is limited to environments that have this support feature disabled. Our procedures did not assess any other SD-WAN or SASE (Secure Access Service Edge) environments, and these other environments are wholly segmented from the scope of this report via dedicated AWS VPCs. Changes to this configuration would be logged at the application level and are the responsibility of the customer to monitor.

VMware does provide support in which they may be tasked with making network configuration changes or management console access changes on behalf of the customer. As such, for requirements 1.2, 1.3, and some sub-requirements in requirement 7, VMware does execute customer configuration changes or access changes. However, VMware delegates the compliance impact of any such changes to the customer, in that any changes resulting
in compliance/non-compliance would be the customers responsibility. Therefore, these activities would be considered non-applicable to SD-WAN’s PCI environment, and wholly the responsibility of VMware’s customers.

SD-WAN is dependent on WorkSpace One Access (WS1) for authentication and administration of components. This application and components are covered under a separate Workspace One Access ROC and AOC.

| Does your business use network segmentation to affect the scope of your PCI DSS environment? | □ Yes  ☒ No |
| (Refer to “Network Segmentation” section of PCI DSS for guidance on network segmentation) |
### Part 2f. Third-Party Service Providers

<table>
<thead>
<tr>
<th>Question</th>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>Does your company have a relationship with a Qualified Integrator &amp; Reseller (QIR) for the purpose of the services being validated?</td>
<td></td>
<td>☒ No</td>
</tr>
<tr>
<td>Name of QIR Company:</td>
<td></td>
<td>Not Applicable</td>
</tr>
<tr>
<td>QIR Individual Name:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Description of services provided by QIR:</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**If Yes:**

<table>
<thead>
<tr>
<th>Name of service provider:</th>
<th>Description of services provided:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Amazon Web Services (AWS)</td>
<td>Cloud Service Provider</td>
</tr>
</tbody>
</table>

**Note:** Requirement 12.8 applies to all entities in this list.
### Part 2g. Summary of Requirements Tested

For each PCI DSS Requirement, select one of the following:

- **Full** – The requirement and all sub-requirements of that requirement were assessed, and no sub-requirements were marked as “Not Tested” or “Not Applicable” in the ROC.
- **Partial** – One or more sub-requirements of that requirement were marked as “Not Tested” or “Not Applicable” in the ROC.
- **None** – All sub-requirements of that requirement were marked as “Not Tested” and/or “Not Applicable” in the ROC.

For all requirements identified as either “Partial” or “None,” provide details in the “Justification for Approach” column, including:

- Details of specific sub-requirements that were marked as either “Not Tested” and/or “Not Applicable” in the ROC
- Reason why sub-requirement(s) were not tested or not applicable

**Note:** One table to be completed for each service covered by this AOC. Additional copies of this section are available on the PCI SSC website.

<table>
<thead>

Section 2: Report on Compliance

This Attestation of Compliance reflects the results of an onsite assessment, which is documented in an accompanying Report on Compliance (ROC).

| The assessment documented in this attestation and in the ROC was completed on: | 3/31/2022 |
| Have compensating controls been used to meet any requirement in the ROC? | ☒ Yes | ☐ No |
| Were any requirements in the ROC identified as being not applicable (N/A)? | ☒ Yes | ☐ No |
| Were any requirements not tested? | ☐ Yes | ☒ No |
| Were any requirements in the ROC unable to be met due to a legal constraint? | ☐ Yes | ☒ No |
Section 3: Validation and Attestation Details

Part 3. PCI DSS Validation

This AOC is based on results noted in the ROC dated March 31, 2022.

Based on the results documented in the ROC noted above, the signatories identified in Parts 3b-3d, as applicable, assert(s) the following compliance status for the entity identified in Part 2 of this document (check one):

- **Compliant:** All sections of the PCI DSS ROC are complete, all questions answered affirmatively, resulting in an overall **COMPLIANT** rating; thereby VMware, Inc. has demonstrated full compliance with the PCI DSS.

- **Non-Compliant:** Not all sections of the PCI DSS ROC are complete, or not all questions are answered affirmatively, resulting in an overall **NON-COMPLIANT** rating, thereby (Service Provider Company Name) has not demonstrated full compliance with the PCI DSS.

**Target Date for Compliance:**
An entity submitting this form with a status of Non-Compliant may be required to complete the Action Plan in Part 4 of this document. **Check with the payment brand(s) before completing Part 4.**

- **Compliant but with Legal exception:** One or more requirements are marked “Not in Place” due to a legal restriction that prevents the requirement from being met. This option requires additional review from acquirer or payment brand.

  If checked, complete the following:

<table>
<thead>
<tr>
<th>Affected Requirement</th>
<th>Details of how legal constraint prevents requirement being met</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Part 3a. Acknowledgement of Status

**Signatory(s) confirms:**
(Choose all that apply)

- The ROC was completed according to the *PCI DSS Requirements and Security Assessment Procedures*, Version 3.2.1, and was completed according to the instructions therein.

- All information within the above-referenced ROC and in this attestation fairly represents the results of my assessment in all material respects.

- I have confirmed with my payment application vendor that my payment system does not store sensitive authentication data after authorization.

- I have read the PCI DSS and I recognize that I must maintain PCI DSS compliance, as applicable to my environment, at all times.

- If my environment changes, I recognize I must reassess my environment and implement any additional PCI DSS requirements that apply.
Part 3a. Acknowledgement of Status (continued)

☒ No evidence of full track data\(^1\), CAV2, CVC2, CID, or CVV2 data\(^2\), or PIN data\(^3\) storage after transaction authorization was found on ANY system reviewed during this assessment.

☒ ASV scans are being completed by the PCI SSC Approved Scanning Vendor Tenable.io

Part 3b. Service Provider Attestation

Signature of Service Provider Executive Officer: Vladimir Smirnov  
Date: June 9, 2022  
Service Provider Executive Officer Name: Vladimir Smirnov  
Title: Director of Technical Operations

Part 3c. Qualified Security Assessor (QSA) Acknowledgement (if applicable)

If a QSA was involved or assisted with this assessment, describe the role performed: QSA performed independent testing of PCI-DSS Version 3.2.1 requirements. See also the Independent Assessor's Report.

Signature of Duly Authorized Officer of QSA Company: Angie Hipsher-Williams  
Date: June 9, 2022  
Duly Authorized Officer Name: Angie Hipsher-Williams  
QSA Company: Crowe LLP

Part 3d. Internal Security Assessor (ISA) Involvement (if applicable)

If an ISA(s) was involved or assisted with this assessment, identify the ISA personnel and describe the role performed:

---

\(1\) Data encoded in the magnetic stripe or equivalent data on a chip used for authorization during a card-present transaction. Entities may not retain full track data after transaction authorization. The only elements of track data that may be retained are primary account number (PAN), expiration date, and cardholder name.

\(2\) The three- or four-digit value printed by the signature panel or on the face of a payment card used to verify card-not-present transactions.

\(3\) Personal identification number entered by cardholder during a card-present transaction, and/or encrypted PIN block present within the transaction message.
### Part 4. Action Plan for Non-Compliant Requirements

Select the appropriate response for “Compliant to PCI DSS Requirements” for each requirement. If you answer “No” to any of the requirements, you may be required to provide the date your Company expects to be compliant with the requirement and a brief description of the actions being taken to meet the requirement.

*Check with the applicable payment brand(s) before completing Part 4.*
