

Trust, Security and Innovation Critical for Long Term Success of Singapore's Financial Services Industry

Innovative digital services drive competitiveness and outcomes for faster post-pandemic recovery

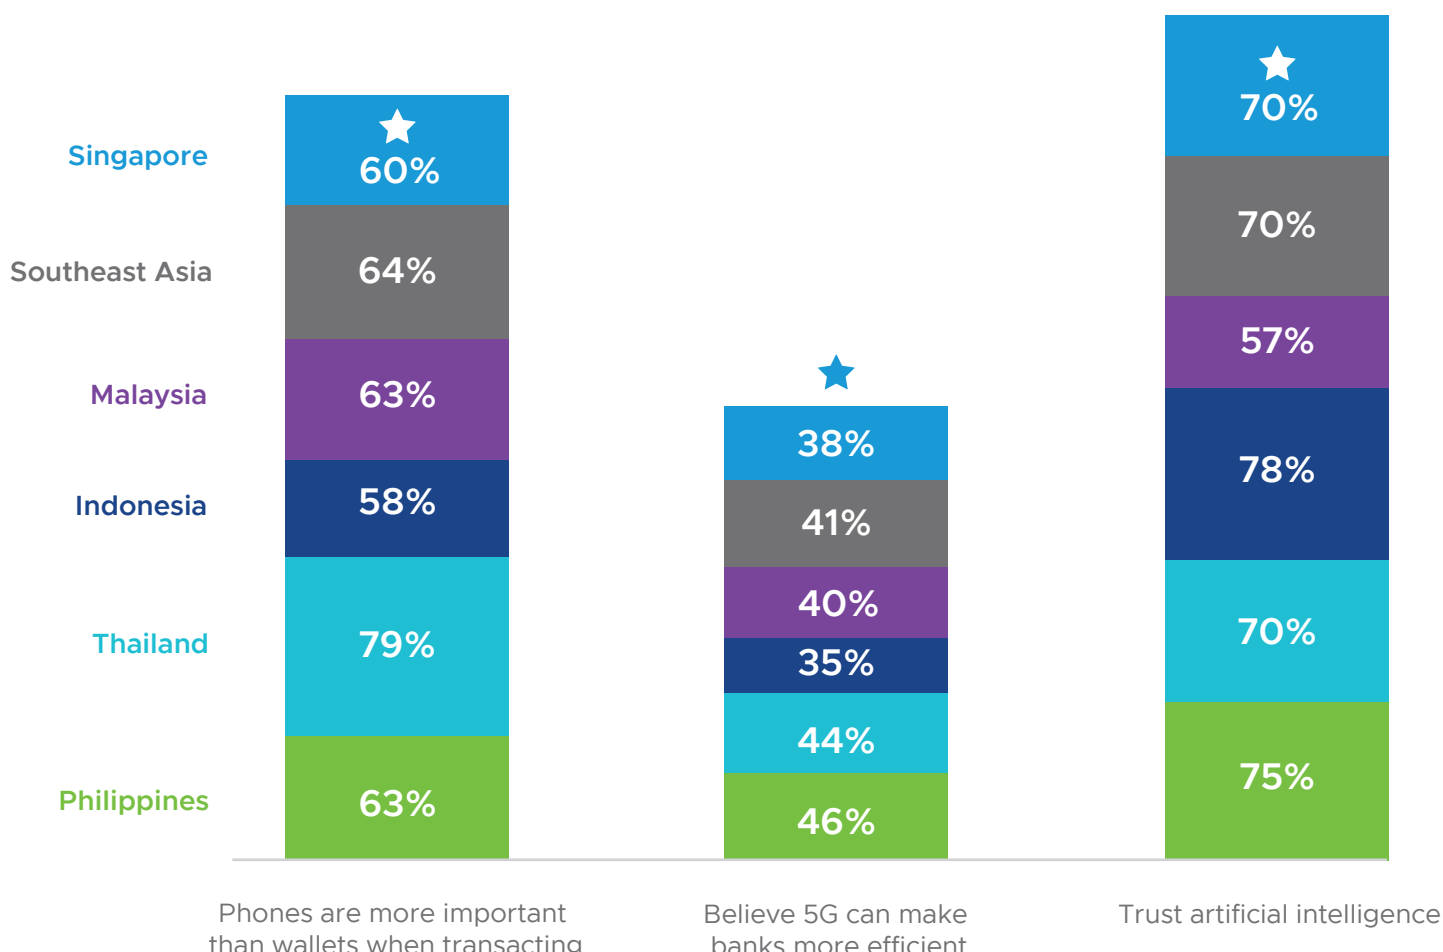

The customer battleground for Singapore's financial ecosystem has gone virtual

Singaporean consumers prefer to engage digitally via apps rather than visiting in-person at a branch, but more needs to be done to drive digital adoption

Next-generation technologies will shape Singapore's cashless future

Singaporeans have gained a better appreciation of technology's role in creating value over the past year

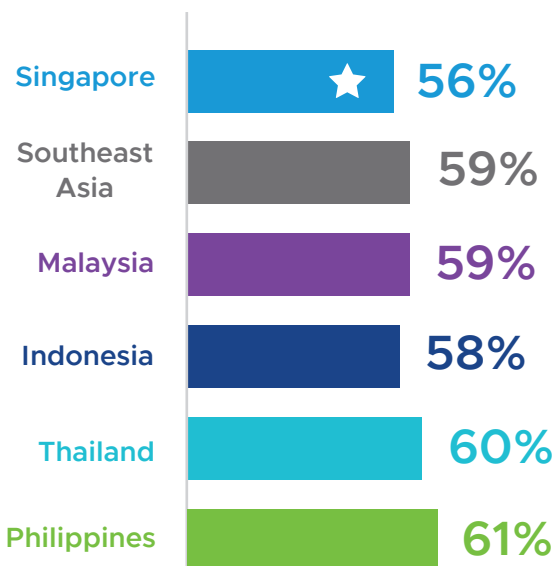

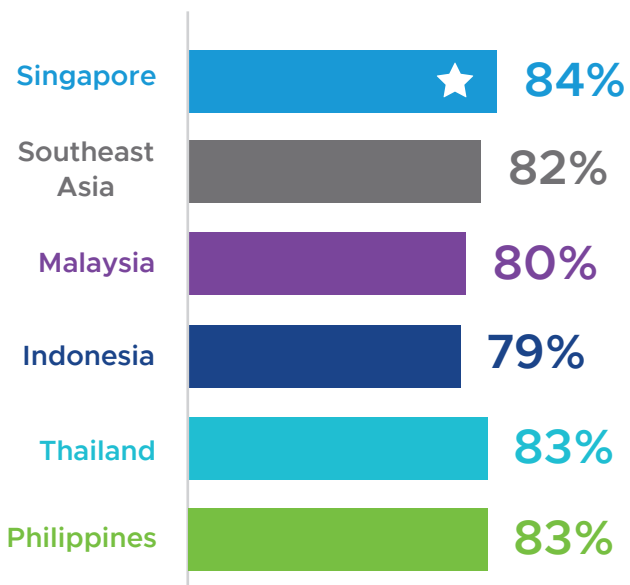

Personalized, secure and privacy-focused digital experiences as growth enablers

Trust and privacy are key drivers to building a trusted and inclusive financial ecosystem in Singapore

Security is the number one priority when choosing a financial services provider

Consumers trust the financial services firms in securing their personal data and information

Technology and innovation key to accelerating Singapore's economic growth and recovery

01

Prioritize a multi-cloud and app-led ecosystem

02

Drive connectivity and innovation in a distributed work environment

03

Ensure Intrinsic Security across platforms

A Trusted Digital Foundation
