

## IONOS Private Cloud Enjoy maximum flexibility with the private cloud

[www.ionos.co.uk/private-cloud](http://www.ionos.co.uk/private-cloud)

### The IONOS Private Cloud - powered by VMware

The IONOS Private Cloud gives you all the benefits of a cloud environment - with higher levels of security thanks to dedicated hardware and infrastructure that's yours to use. Thanks to VMware, users benefit from one of the leading virtualisation solutions for your own, highly secure platform. The IONOS Private Cloud is also the ideal platform for business applications, with maximal flexibility and cost efficiency thanks to a pay-as-you-go licensing model.

### Pay-as-you-go licensing and by-the-minute billing offer the greatest freedom

IONOS is the first provider on the market to offer a flexible pay-as-you-go model for private clouds including VMware. Your costs are automatically reduced whenever your reserved cluster is not fully utilised. With by-the-minute billing and no contractual ties, we ensure maximum flexibility. The result is a tailor-made and up-to-date solution that covers every need.

### Latest Intel® Optane™ technology for more performance

Your IONOS Private Cloud runs exclusively on high performance, state-of-the-art hardware and virtualisation technology. vSAN, NSX-T, Intel Optane and NVMe storage provide processing speeds that significantly optimise your workloads.

Individual cloud-based data centre

Managed VMware environment

Pay-as-you-go licensing model

Latest technology like vSAN, NSX-T and 2nd Gen Intel Xeon processors

Certified security

## Your software-defined data centre

## Your security is our top priority

The IONOS Private Cloud offers the highest levels of security because computing and storage resources are not shared with other companies. You retain complete control. In addition, IONOS ensures data protection in accordance with the strict requirements of German and European law. In combination with GDPR guidelines, IONOS has more than 30 years of experience in providing a highly secure environment for your data, with fail-safe cloud infrastructure hosted in ISO 270001 certified data centres. Thanks to standardised ITIL/ITS processes, your data is always available.

## Expert consulting

- 
**Individual**  
 A server expert at your side
- 
**Mentoring**  
 Custom cloud transformation and workload optimisation solutions
- 
**Free**  
 Personal support
- 
**Fast**  
 24/7 expert support
- 
**On equal terms**  
 Close cooperation

## Private cloud without compromise

-  Maximal flexibility with pay-as-you-go
-  Price-performance champion
-  Tailor-made solutions and advice
-  Get started easily with familiar VMware virtualisation software
-  High security and availability
