Summary

Through VMware IT Academy, “Data Center Virtualization: Core Technical Skills” prepares the learner for a starting position in the datacenter domain. Through a series of targeted, self-paced lessons, the student acquires the skills to perform operational tasks typically assigned to the roles of operator or junior administrator.

Prerequisites

Learners should have a good understanding of the basic compute components of the data center.

Target audience

- Upper-secondary students
- Community college/technical college
- College and university
- Technical learners/professionals
