

VMware Carbon Black Cloud Deploy and Get Started with Workload Advanced

AT A GLANCE

The primary objective of this service is to assist customer on deploying and getting started with the VMware Carbon Black Cloud Workload Advanced purchase. This service provides a number of knowledge transfer workshops on topics required for the customer to start using the VMware Carbon Black Cloud Workload Advanced SaaS product.

A VMware Consultant will work jointly with the Customer team via remote working sessions to assist on implementing VMware Carbon Black Cloud Workload appliance on vCenter, UI and product functionality walkthrough.

KEY BENEFITS

- Rapid time to value on your newly purchased VMware Carbon Black Cloud Workload Advanced SaaS product.
- Increase security posture and visibility, decrease incident response time, and lock out malicious attacks before they have a chance to infiltrate your data.

Overview

The VMware Carbon Black Cloud Deploy and Get Started with Workload Advanced service assists you with deploying and configuring the Carbon Black Workload Appliance on vCenter, Carbon Black Cloud administration console UI walkthrough, policy/rules review, and best practices on alerts tuning.

This service is ideal for organizations who are new to the VMware Carbon Black Cloud Workload Advanced SaaS product, and desire to quickly configure the system for a rapid time to value experience.

Part Number / SKU	Service Description
VSEC-CB-CLDPS-DPY-GS-W-ADV	VMware Carbon Black Cloud-PS-Deploy and Get Started with Workload Advanced (REMOTE ONLY)

Project Scope

The scope of the service includes the following:

VSEC-CB-CLDPS-DPY-GS-W-ADV

VMware Carbon Black Cloud Deploy and Get Started with Workload Advanced (REMOTE ONLY)

Deploy one VMware Carbon Black Cloud Workload Appliance, configure one instance of the VMware Carbon Black Cloud to meet customer's security requirements. Service includes configuration and extension of the customer's VMware Carbon Black Cloud instance via interactive business needs, and product configuration best practices workshops.

Specification	Parameters	Description
Carbon Black Cloud Workload Appliance	Up to one (1)	Deploy and configuration of Carbon Black Cloud Workload appliance
Carbon Black vCenter Server Plug-In	Up to one (1)	Install Carbon Black vCenter Server Plug-In
Carbon Black Cloud Administration Console Integration	Up to one (1)	Assist in integrating Carbon Black Cloud workload appliance with the Carbon Black Cloud administration console.

vSphere Workload(s) Configuration	Up to five (5)	Enable Carbon Black for up to 5 vSphere workloads in the supported vSphere environment
Event forwarder, Syslog, Signature mirror, SIEM or API connector integration(s)	Up to one (1)	Assist in integrations of supported Connectors.
Two-Factor Authentication or SAML Config	Up to one (1)	Assist in integration of a supported third-party authentication solution.
Knowledge Transfer workshop(s)		Conduct Knowledge transfer workshops of the following: WebUI walkthrough, audit and remediation walkthrough, vulnerability, investigate alerts, alert triage, create notifications, Q&A.

Outcomes

Customer will be able to accomplish the following outcomes after the project:

- Reduce the attack surface and harden workloads
- Secure workload against modern attacks
- Increase visibility across the customer environment
- Simplify operations for IT and Security

Estimated Schedule

VMware consulting services will be performed according to a schedule agreed to by both parties. Typically, consulting services are performed during normal business hours and workdays (weekdays and non-holidays).

Project Activities

The activities for this engagement are organized in phases below.

Phase 1: Initiate

The VMware Project Manager coordinate project initiation via email with key Customer and VMware stakeholders. Topics includes the following:

- Project business drivers, scope, and objectives.
- Project deadlines, estimated timelines, scheduling, and logistics.
- Identification of key Customer team members with whom VMware will work to perform the tasks defined in this SOW.
- Participating team members are confirmed, and contact details are exchanged to schedule the project kickoff meeting.

Deliverables

- One (1) project initiation email

Phase 2: Plan

VMware leads one (1) project kickoff meeting with Customer project sponsors and stakeholders to review expectations about the purpose of the engagement, the delivery approach, and estimated timelines. The following are the objectives of the meeting:

- Introducing the VMware team, roles, and responsibilities.

- Describing the project goals, phases, and key dates.
- Agreeing on communication and reporting process and creating a communications plan.
- Validating the project expectations and clarifying roles and responsibilities
- Confirming prerequisites are met as detailed in the solution checklist for specified solutions.
- Presenting the solution overview for specified solutions including expected project results and deliverables.
- The VMware Project Manager and the Customer Project Manager collaborate to develop the project plan.

Deliverables

- Communications plan
- One (1) project kickoff meeting
- Project Plan
- Solution checklist
- Solution overview presentation

Phase 3: Execute

The key activities for this phase are organized in the following sub-phases:

- Implement
- Knowledge Transfer

Phase 3.1 Execute: Implement

VMware implements the solution according to the VMware project definition document. VMware does the following:

- Implements the specified solutions as detailed in the specification workbooks.
- Verifies the implementation and documents results in the verification workbooks for the specified solutions.

Deliverables

- Solution specification workbook
- Solution verification workbook

Phase 3.2: Execute: Knowledge Transfer

VMware conducts knowledge transfer sessions covering the design, implementation, and operational considerations relating to the scope of this project. VMware does the following:

- Conducts up to twelve (12) hours of knowledge transfer sessions for appropriate Customer representatives.
- Provides an adoption guide document(s) containing operational guidance for the specified solutions.

Note: For the avoidance of doubt, the Knowledge transfers herein do not comprise VMware product training or certification courses as offered by the VMware Education unit -(<http://mylearn.vmware.com/mgrreg/index.cfm>).

Deliverables

- Adoption guide document
- Knowledge transfer workshop presentation
- Up to twelve (12) hours of knowledge transfer sessions

Phase 4: Close

The VMware Project Manager sends email to the Customer covering project status, next steps, and how to engage further with VMware.

Deliverables

- One (1) closure email

Out of Scope

The following are the out of scope items for this project.

General

- Installation and configuration of custom or third-party applications and operating systems on deployed virtual machines.
- Operating system administration including the operating system itself or any operating system features or components.
- Management of change to virtual machines, operating systems, custom or third-party applications, databases, and administration of general network changes within Customer control.
- Remediation work associated with any problems resulting from the content, completeness, accuracy, and consistency of any data, materials, or information supplied by Customer.
- Installation or configuration of VMware products not included in the scope of this document.
- Installation and configuration of third-party software or other technical services that are not applicable to VMware components.
- Configuration of VMware products used for the service other than those implemented for the mutually agreed to use cases.
- Customer solution training other than the defined knowledge transfer session.

Carbon Black Cloud Deploy and Get Started with Workload Advanced

- Remediation/removal of unauthorized, malicious, or unwanted files.
- Investigation and analysis of potential malware and threats.
- Configuring more than one administration console.
- Building of custom scripts or feeds.
- Performing custom threat feed configuration.
- Customer solution training other than the defined in scope services.
- Developing custom documentation.
- Troubleshooting integration or infrastructure issues when deemed to be non-Company product issues.

Prerequisites Checklist

Customer is responsible for executing all items discussed in the Service Checklist prior to starting of the Execution phase.

- VMware vCenter Server 6.7 U1, 6.7 U2, 6.7 U3, 7.0, 7.0 U1
- VMware ESXi 6.5 U3, 6.7 U1, 6.7 U2, 6.7 U3, 7.0, 7.0 U1
- VMware Tools 11.2 or later

Participation of the following Customer stakeholders is required for the Service to be performed:

- Enterprise Architect
- Infrastructure Architect
- IT Operations Manager
- IT Security Manager

TERMS AND CONDITIONS

This datasheet is for informational purposes only. VMWARE MAKES NO WARRANTIES, EXPRESS OR IMPLIED, IN THIS DATASHEET. All VMware service engagements are governed by the VMware Professional Services [General Terms and Conditions](#). If you are located in the United States, the VMware contracting entity for the service will be VMware, Inc. If you are outside the United States, the VMware contracting entity will be VMware International Limited.

If you purchase this packaged service outside of the ELA, the service must be delivered and accepted within the first 12 months of the purchase, or the service will be forfeited. Pricing for this service includes travel and other expenses. For detailed pricing, contact your local VMware representative.
