VMware vSAN Health Check
Enterprise Medium

At a glance
The VMware vSAN Health Check Enterprise Medium service examines the vSAN and vSphere infrastructure that support an organization's global production environment and provides remediation recommendations.

Key benefits
- Get recommendations on how to optimize vSphere with vSAN deployments
- Mitigate risk by leveraging experienced consultants and automation of environment analysis
- Take advantage of VMware proven practices

SKU
CON-VSAN-HC-ENT-M-C

Service overview
The VMware vSAN™ Health Check Enterprise Medium service is designed to review and provide remediation advice for a VMware vSAN and VMware vSphere® environment, including VMware vCenter Server®, vSAN clusters, and individual VMware ESXi™ hosts.

The service requires the following VMware on-premises, VMware SaaS and third-party products, with vendor-supported versions as agreed to by VMware and Customer at project kickoff, but limited to those that are in general availability (GA) on the date of SOW signing:

- VMware vSphere 6.7.x or 7.0.x
- VMware vSAN 6.7.x or 7.0.x

Project scope
The scope of the service includes the following activities:

- Assess storage virtualization health
- Review of Customer vSAN and vSphere environment (VMware ESXi hosts, VMware vCenter Server infrastructure and vSAN) to assess conformance with VMware proven practices.

This service can be delivered with different scopes. Only one of the two following scopes may be chosen.

Scope 1: Standard scope

<table>
<thead>
<tr>
<th>Service scope 1</th>
<th>Parameters</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Specification</td>
<td>Parameters</td>
<td>Description</td>
</tr>
<tr>
<td>Architectural design review</td>
<td>Up to one (1)</td>
<td>Architectural design review workshop.</td>
</tr>
<tr>
<td>Customer environment interviews</td>
<td>Up to one (1)</td>
<td>Customer environment interviews.</td>
</tr>
<tr>
<td>HealthAnalyzer deployments</td>
<td>Up to one (1)</td>
<td>HealthAnalyzer deployments performed.</td>
</tr>
</tbody>
</table>
### Scope 2: Alternative scope

<table>
<thead>
<tr>
<th>Specification</th>
<th>Parameters</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Architectural Design review</td>
<td>Up to one (1)</td>
<td>Architectural design review workshop.</td>
</tr>
<tr>
<td>Customer environment interviews</td>
<td>Up to one (1)</td>
<td>Customer environment interviews.</td>
</tr>
<tr>
<td>HealthAnalyzer deployments</td>
<td>Up to one (1)</td>
<td>HealthAnalyzer deployments performed.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>vCenter servers</th>
<th>Up to two (2)</th>
<th>vCenter servers to be analyzed.</th>
</tr>
</thead>
<tbody>
<tr>
<td>vSAN clusters</td>
<td>Up to two (2)</td>
<td>vSAN clusters to be analyzed.</td>
</tr>
<tr>
<td>ESXi hosts</td>
<td>Up to sixty-four (64)</td>
<td>ESXi hosts to be analyzed.</td>
</tr>
<tr>
<td>Health check reports</td>
<td>Up to one (1)</td>
<td>Health check reports to create.</td>
</tr>
</tbody>
</table>

### Out of scope

The following tasks are out of scope items for this project.

**General**

- Installing and configuring custom or third-party applications and operating systems on deployed virtual machines.
- Operating system administration including the operating system itself or any operating system features or components.
- Managing change to virtual machines, operating systems, custom or third-party applications, databases, and administration of general network changes within Customer control.
- Remediation work associated with any problems resulting from the content, completeness, accuracy, and consistency of any data, materials, or information supplied by Customer.
• Installing or configuring VMware products not included in the scope of this
document.

• Installing or configuring third-party software or other technical services that
are not applicable to VMware components.

• Installing or configuring Customer-signed certificates.

• Configuring VMware products used for the service other than those
implemented for the mutually agreed-to use cases.

• Customer solution training other than the defined knowledge transfer session.

Assess storage virtualization health
• Remediation of virtual infrastructure issues, whether discovered in the health
check or otherwise.

Estimated schedule
This service is estimated to be for a duration of up to two (2) weeks. VMware
will operate according to a schedule agreed to by both parties. The consulting
services are performed during normal business hours and workdays (weekdays
and non-holidays).

Project activities
Phase 1: Initiate
The VMware Project Manager hosts one (1) project initiation call with key
Customer and VMware stakeholders. Topics to be discussed include:

• Project business drivers, scope, and objectives.

• Project deadlines, estimated timelines, scheduling, and logistics.

• Identification of key Customer team members who VMware will work with to
perform the tasks defined in this datasheet.

• Participating team members are confirmed and contact details are exchanged
to schedule the project kickoff meeting.

Deliverables
• One (1) project initiation call

Phase 2: Plan
VMware leads one (1) project kickoff meeting with Customer project sponsors
and stakeholders to review expectations about the purpose of the engagement,
the delivery approach, and estimated timelines. The objectives of the meeting
are:

• Introduce the VMware team, roles, and responsibilities.

• Describe the project goals, phases, and key dates.
• Agree on communication and reporting process and create a communications plan.
• Validate the project goals, phases, and key dates.

Deliverables
• Communications Plan
• One (1) project kickoff meeting
• Project Plan

Phase 3: Execute
VMware leads the Customer project team in a series of workshops and data collection activities to collect Customer-specific data and determine gaps between the current state and target state. VMware does the following tasks:
• Conducts up to fifty-eight (58) hours of assessment workshops.
• Presents a summary of the findings detailed in the summary report.
• Carries out an assessment of the current Customer VMware software configuration against VMware best practices, which is documented in the summary report.

Deliverables
• Up to fifty-eight (58) hours of assessment workshops
• Summary presentation
• Summary report

Phase 4: Close
The VMware Project Manager conducts one (1) closure meeting with the Customer covering project status, next steps, and how to engage further with VMware.

Deliverables
• Engagement summary presentation
• One (1) closure meeting

Appendix

Service checklist
The Customer is responsible for executing all items discussed in the service checklist prior to arrival of the VMware consultants on site.

The participation of the following Customer stakeholders is required for the Service to be performed:

• Enterprise architect
• Infrastructure architect
• VMware operations team leads

The following prerequisites are required to enable VMware to perform this service:

• Number of vCenter Server instances. Defined minimum: 1

This service must be delivered and accepted within the first 12 months of purchase, or the service will be forfeited. Pricing for this service excludes travel and other expenses. For detailed pricing, contact your local VMware representative.
