

VMware Workspace ONE Boxer

A Faster, Smarter Mobile Inbox

MOBILE WORKFORCE CHALLENGES

- **Employee experience** – Absence of a consumer-grade digital experience employees expect.
- **Connectivity** – Lack of secure, cost-effective and reliable remote access to enterprise applications.
- **Security** – Abundance of malware, phishing, spam and other security threats.

Using portable devices for work tasks saves employees 58 minutes per day while increasing productivity by 34%¹

Mobile employees are taking advantage of being connected 24/7 to help them be more productive on-the-go. Mobile employees are highly responsive, leveraging mobile technology to help them stay connected in a fast-paced business environment.

A faster, smarter mobile inbox can be configured to the employee's way of work. Employees can get more done in less time with Workspace ONE Boxer!

What is Workspace ONE Boxer?

VMware Workspace ONE Boxer is an enterprise email, calendar, and contacts system that seamlessly integrates with Exchange, Office 365, Gmail, and other apps to enhance mobile productivity. The containerization of business data from personal data enables IT organizations to exceed their enterprise security, compliance, data leakage prevention (DLP) and user privacy requirements.

1. Frost & Sullivan

VMware Workspace ONE Boxer provides benefits to key groups across the organization.

END USERS

- **Integrated experience** across email, calendar and contacts streamlining mobile micro-moments.
- **Freedom of choice** by enabling mobile and frontline employees to work anywhere using any device or OS for both BYO and corporate-liable devices.
- **Personalization** with customization and account preferences.

IT/SECURITY TEAMS

- **Enterprise-grade security and support** for BYO and corporate-liable devices.
- **Adherence to organization specific compliance policies** around email access, use and tracking.
- **Organization specific Spam and Phishing** reporting.

Why VMware Workspace ONE Boxer?

VMware Workspace ONE Boxer is highly customizable, allowing users to personalize the app to meet their needs and working style. With features like custom swipe gestures, quick replies, send availability, custom smart folders, contact avatars, email notification settings and more. Boxer is designed to be personalized so users can work faster than ever on mobile. The all-in-one email, calendar and contacts app provides an intuitive user experience following native operating system (OS) design guidelines and can surface notifications and action workflows from other business systems with Workspace ONE mobile flows. Users can streamline workflows by leveraging unique capabilities in Boxer, such as sharing availability by simply selecting available timeslots on the calendar, single tap conference call dialing and even manage multiple accounts to the Boxer app.

A New Bar for Email Security

Workspace ONE Boxer has been certified against the international security standard for application software, defined under the Common Criteria Recognition Arrangement (CCRA), plus a U.S.- specific Common Criteria extension for email clients, defined by the National Information Assurance Partnership (NIAP).

With the NIAP Common Criteria certification, the Boxer app has set a new bar for email security. Boxer meets the most stringent security requirements in highly regulated industries including government, financial services and healthcare.

Some noteworthy Boxer security features used by customers across the globe include multiple email S/MIME for signing and encrypting emails, email classification tagging, external sender warning, AES 256-bit encryption, automated compliance actions and more.

Why VMware?

With an industry-first architecture that empowers employees to work from anywhere, VMware is committed to developing a best-in-class mobile experience to enhance productivity. Workspace ONE Boxer is the all-in-one email, calendar and contacts solution that offers an unmatched blend of intuitive productivity features built on top of industry-leading security, compliance and privacy controls making it an ideal solution to safeguard your company information.
