VMware Cloud Flex Storage – Privacy Datasheet

How VMware Cloud Flex Storage brings value to you!
VMware Cloud Flex Storage™ is a natively integrated and fully VMware-managed cloud storage and data management service that can be used to independently provision and scale VMware Cloud™ on AWS software defined data center (“SDDC”) virtual machine storage capacity. Virtual machine storage capacity is presented as NFS datastores that can be attached to SDDC hosts through a simplified workflow. VMware Cloud Flex Storage intelligently combines cloud-native abstractions to deliver exceptional performance and cost across traditional and modern workloads. With just a few clicks in the VMware Cloud Services Console, customers can scale their storage environment without adding hosts, and elastically adjust their storage capacity up or down as needed, for every application. Customers also benefit from a simple pay-as-you-go consumption model.

VMware Cloud Flex Storage™ has the following components:

- Scale-Out Cloud File System – a hosted component that enables efficient, performant, secure, and resilient storage of virtual machines in cloud storage.
- SaaS Storage Manager – a hosted component that presents a user interface (UI) to consume the Service Offering and includes cloud storage management capabilities for NFS datastores and SCFS instances.

VMware Cloud Flex Storage™ also provides access to the following service consoles:

- Global Storage Console – the user interface for provisioning Storage Regions and creating subscriptions.
- VMware Cloud Console – the user interface for provisioning SDDCs.

For more information, see the VMware Cloud Flex Storage™ Service Description available [here](https://www.vmware.com/products/vmc-flex-storage.html).

ABOUT VMWARE CLOUD FLEX STORAGE
VMware Cloud Flex Storage™ offers a scalable, elastic, and natively integrated storage and data management service that is fully managed by VMware and delivered with cloud economics.

VMware and Privacy

In a complex world of data and the digital era our goal is simple: At VMware, you, our customers, and your data are our primary concern. VMware takes privacy and data protection very seriously and is committed to providing clear information about how we collect, use and process your personal data. We have established policies and practices designed to protect the personal data we process on behalf of our customers (as a processor), and as a controller. We are also committed to privacy-by-design when developing products and services. VMware’s Privacy Team actively works with the development teams to identify and embed privacy controls for customers.

The personal data collected and processed by VMware are largely dependent on the type of offering you purchase. This Privacy Datasheet provides you with information about how VMware processes and protects your personal data in connection with VMware Cloud Flex Storage™.

Types of Data Collected by VMware Cloud Flex Storage

In connection with the customer’s use and VMware’s provision of the Service Offering, VMware collects, and further processes data as classified in the table below. In some instances, personal data may be included in such data. Generally, VMware Cloud Flex Storage only processes the personal data of the customer’s administrators and other people Customer authorizes to use the Service Offering on their behalf.

<table>
<thead>
<tr>
<th>VMware Data Classification</th>
<th>Description and Purpose of processing</th>
<th>Categories of Personal Data</th>
</tr>
</thead>
<tbody>
<tr>
<td>Customer Content</td>
<td>Content submitted by customer to the Service Offering for processing, storage, or hosting (described as “Your Content” in VMware’s Terms of Service). To the extent the Service Offering processes Customer Content, VMware processes such Content to provide the Service.</td>
<td>Generally, customer controls and determines which type of personal data it submits to the Service Offering. The specific personal data processed will depend on the customer’s specific configurations and deployment. VMware does not know the types of personal data submitted to the Service by the Customer.</td>
</tr>
<tr>
<td>Support Request Content</td>
<td>Data provided by customer to VMware to address a technical support issue.</td>
<td>Any personal data customer shares with VMware in connection with a support request (as controlled and determined by Customer).</td>
</tr>
</tbody>
</table>
### Account Data

Data collected and used by VMware to manage the customer account and maintain the relationship with customer, such as to bill the customer or deliver notifications and alerts.

- **Contact Information**, such as customer name, email address, address and phone number.
- **Online Identifiers** such as customer’s IP address or login credentials.

### Service Operations Data

Data used by VMware to facilitate the delivery of the Service. This may include:
- (i) tracking entitlements,
- (ii) providing support,
- (iii) monitoring the performance, integrity, and stability of the Service’s infrastructure,
- (iv) preventing or addressing Service or technical issues.

For example:
- Configuration, usage and performance data
- Authentication Data
- Service logs, security logs, and diagnostic data
- Survey and feedback data

- **Contact Information**, such as administrators’ name, email address and phone/mobile number.
- **Online Identifiers** such as administrators’ and developers’ IP address, login credentials or login time stamps.

### Service Usage Data

Information used by VMware for analytics, product improvement purposes, and proactive support.

See [VMware Trust & Assurance Center](#) for additional details regarding VMware’s Service Usage Data Program (SUDP). For example: Configuration, usage and performance data.

- **Contact Information**, such as administrators’ email address (e.g. to provide proactive support).
- **Online Identifiers** such as administrators’ IP address.

---

### How We Process and Protect Data as a Controller

To the extent VMware processes personal data as part of Account Data, Service Operations Data and Service Usage Data, VMware acts as the Controller in respect to such personal data. The following privacy notices explain how VMware collects, uses and protects any personal data in its capacity as a Controller:

- **VMware Privacy Notice**: This notice addresses the personal data we collect when you purchase VMware products and services and provide account-related personal data.
- **VMware Products and Services Privacy Notice**: This notice applies only to the limited personal data we collect and use for our own purposes in connection with our provision of VMware products and services, including (i) any cookies and similar tracking technologies we may use when providing the products or...
services; (ii) any information we use to facilitate the delivery of VMware services; and (iii) any data we collect to improve our products and services and our customer’s experience.

How We Process and Protect Data as a Processor
Where VMware processes personal data contained in Customer Content in connection with the provisioning of the Service Offering, VMware will process such personal data on behalf of the customer as a “processor” (acts on the instruction of the controller). The customer is the “controller” of any personal data contained in Customer Content and determines the purposes of the processing.

Data Protection Addendum
VMware’s obligations and commitments as a data processor are set forth in VMware’s Data Processing Addendum ("DPA"). VMware will process personal data contained within Customer Content in accordance with the applicable agreement and the DPA. The applicable agreements for VMware Cloud Flex Storage, including the VMware Terms of Service, the relevant Service Description, and other relevant legal documents can be found here.

Data Storage and Cross-Border Data Transfers
VMware Cloud Flex Storage currently stores Customer Content in data centers located in Canada, Germany, Ireland, France, Italy, Brazil, Sweden, South Africa and the United Kingdom, and the United States of America. Hosting location options may be added from time to time so please visit the Sub-Processors list for up-to-date primary and disaster recovery location details.

For cross-border personal data transfers from the EEA, Switzerland and the UK, VMware relies on Binding Corporate Rules (“BCR”) as a processor. You can view VMware’s BCR’s in the VMware Trust Center.
DATA PRIVACY REQUESTS
If you wish to exercise any of your rights under applicable data privacy laws for personal data processed by your organization while using the Service Offering, please contact your organization. See VMware’s Privacy Notice for information about how to exercise your rights where VMware is processing personal data in connection with its business operations.

Sharing with Sub-Processors
For the Service Offering, VMware utilizes third-party companies to provide certain services on its behalf. As set forth in the Data Processing Addendum, VMware has agreements and data transfer mechanisms in place with each sub-processor. A list of these sub-processors is available here.

Additional sub-processors providing technical support functionality for the Service Offering is available in the Support Services Sub-Processor List.

VMware also provides customers with an easy mechanism to monitor changes to our list of sub-processors. If you would like to receive notifications, please visit this page here.

Data Retention and Deletion Practices
VMware retains personal data that we may collect in connection with the customer’s use of the Service Offering for as long as it is needed to fulfill the obligations of the VMware Terms of Service.

The VMware Data Processing Addendum and the relevant Service Description set forth how personal data contained in Customer Content is deleted after contract expiration or termination. Upon termination of your account, Customer Content will be retained by backup systems for up to 10 calendar days. VMware advises you to retrieve any data you wish to retain before the account termination takes place. VMware has no obligation to retain data beyond 10 days of the effective termination date.

FOR MORE INFORMATION OR TO PURCHASE VMWARE PRODUCTS
Contact your VMware account representative or call 877-4-VMWARE (outside North America, +1-650-427-5000), visit vmware.com/products, or search online for an authorized reseller.
