

You're on your way to using your VMware Horizon SaaS subscription. Let's get started!

WHAT'S THE PROCESS TO ACTIVATE YOUR SUBSCRIPTION?

1

Your organization receives a welcome email from VMware.

- Q** What if you don't receive a welcome email?
- A** You can trigger an invite to individuals in your organization directly from the VMware Cloud Services Platform (CSP) console. In addition, the person who received the welcome email can also forward it to other individuals in your org.

2

Connect your Horizon deployment to the cloud-hosted Horizon Control Plane to activate your subscription license.

Need help setting up the Horizon Edge Gateway? Contact us at fasttrack@vmware.com.

3

Use the Horizon Universal Console to get additional component license keys as needed.

Many VMware Horizon® SaaS editions include VMware vSphere®, VMware vCenter®, VMware vSAN™, VMware ThinApp®, and other components that require license keys.

Congrats! You're now ready to start using your Horizon SaaS subscription.

For additional help, [reach out](#) to us through VMware Customer Connect.
