

VMware Lab Platform™

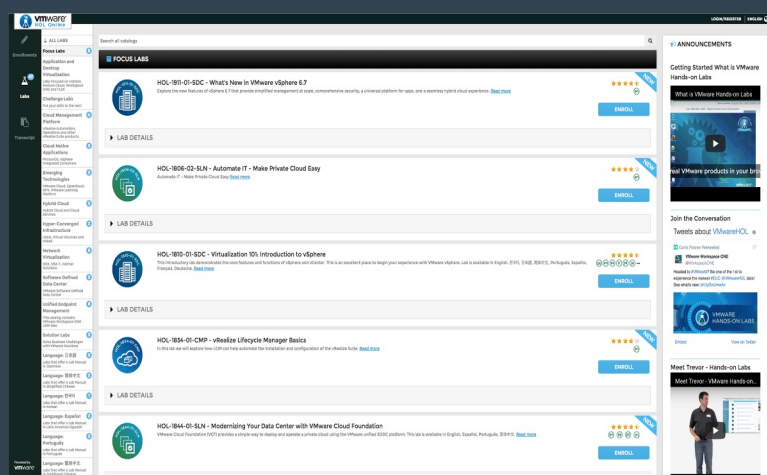

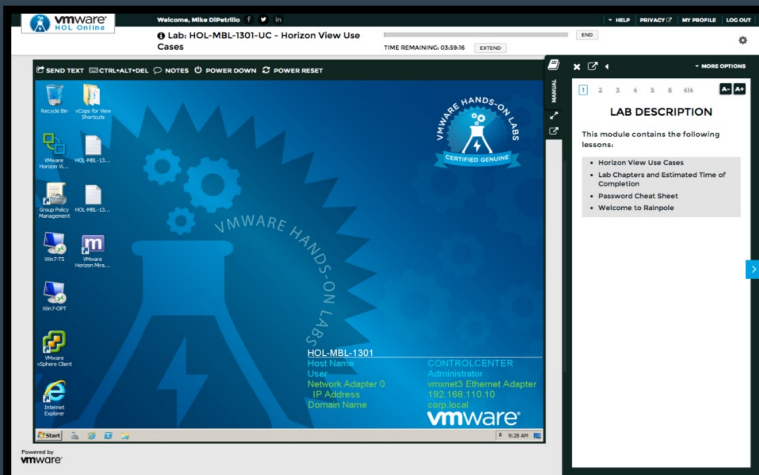

VMware Lab Platform™ (VLP) is a SaaS platform that gives organizations the ability to deliver hands-on virtual training labs to anyone on the planet at cloud scale.

Typical Challenges

- 
Flexible distance Learning
 Users want to learn or train anytime and everywhere due to an ever increasing need for flexibility.
- 
Experiential Learning is necessary to deliver the best educational impact with the highest knowledge retention.
- 
Isolated labs are in demand to combat increasing needs to train for cyber security and attack / defend scenarios.

Solution: Lab Platform

- 
Platform delivering seamless integration of lesson materials, virtual environments, video, and instructor interaction in a unified web-based interface.
- 
Universal device access gives users the ability to interact with customized learning environments using any device they choose.
- 
Cloud Scale solution means that end user audiences can easily be reached through the Cloud – anywhere around the globe.

VMware Lab Platform™

Key Capabilities

On-demand Self-Paced Training: Seamless interactive experience of training labs designed for set it and forget it simplicity consumed at the convenience and pace of your students.

Instructor Led Training: Scalable labs without any of the hassle of managing complex infrastructure.

Live Lab Events: Cloud scale large format live lab training events managed with ease and an amazing end-user learning experience.

Software Evaluation and Live Demos: Reduce sales cycles with Demo or proof of concept software that allows for hand-on interaction with your customers.

Isolated IT Labs for Cyber Security and defense Training: Re-create your datacenter to train users in customized Cyber Security or attack / defend scenarios in a safe and secure environment.

Dell EMC Education Services leverages VMware's Lab Platform (VLP) as the next-generation cloud portal. At present, they primarily use VLP as a teaching platform for the delivery of on-site and online learning. Dell EMC also leverage the platform for both instructor-led sessions and self-paced eLearning, adding significant value to online learning by integrating hands-on activity for a blended learning experience.
