VMware Cloud Provider Platform Plan and Upgrade Advanced

At a glance
VMware Cloud Provider Platform Plan and Upgrade Advanced simplify the assessment, planning and upgrade activities of the cloud provider environments. This service includes a solutions overview, requirements validation, and identification of proper planning for successful operations.

Key benefits
- Keep the VMware Cloud Provider Platform up-to-date
- Free IT staff to work on business-critical activities
- Minimize disruption to existing resources and operations
- Learn how-to and best practices from VMware experts through knowledge transfer

SKU
PS-CLDPV-UPG-ADV

Service overview
VMware Cloud Provider Platform Plan and Upgrade Advanced service provides a rapid assessment, planning, and upgrade of your cloud provider environment. This service will also ensure your team understands the fundamentals of the migration process, and through a knowledge transfer workshop, our team will provide an overview of the VMware methodology, best practices, and information resources.

This offering will include the following:
- Review the current environments and use cases
- Validates requirements to upgrade VMware Cloud Provider Stack™
- Perform an assessment and gap analysis using VMware methodology and tools
- Present and discuss the finding in the assessment
- Present an upgrade plan
- Upgrade VMware Cloud Director™ Appliance from 10.2 to latest 10.4.x
- Upgrade VMware vSphere® from 6.7.x to 7.0.x
- Upgrade VMware NSX-T® Data Center from 3.0.0 to 3.2.x
- Upgrade VMware Aria Operations™ from 8.2 to 8.6.x
- Upgrade VMware Aria Operations™ Tenant App Service from 2.5/2.6 to 8.6.x
- Upgrade VMware Aria Operations™ for Logs from 8.2 to 8.8.x
- Upgrade VMware Aria Operations™ for Networks from 6.1.x to 6.5.x
- Provide knowledge transfer

This service requires VMware on-premises and VMware Cloud products with vendor-supported versions as agreed to by VMware and Customer at project kickoff but limited to those that are in general availability (GA).

Note: Please check the VMware Requirements, and Product Interoperability Matrix and upgrade path links in the Appendix

Service delivery description
Service activities will be entirely delivered remotely by VMware Professional Services. Due to the nature of some on-premises components and security
aspects we require the Customer to join virtual sessions and engage their infrastructure, network, and security teams when appropriate to execute the required actions (i.e., firewall port configurations or appliance deployments) under the VMware team supervision. The delivery team will also require validating the proper configurations and requirements are in place before proceeding with the remote installation.

**Project scope**
The scope of the services delivered is defined in the following tables:

---

### VMware Cloud Provider Platform - Assessment

<table>
<thead>
<tr>
<th>Specification</th>
<th>Parameters</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Review requirements</td>
<td></td>
<td>Review and validation of VMware Cloud Provider Platform environments and requirements</td>
</tr>
<tr>
<td>Gap analysis for environment</td>
<td>Up to one (1)</td>
<td>Gap analysis for the existing environment.</td>
</tr>
<tr>
<td>Implementation plan</td>
<td>Up to one (1)</td>
<td>Implementation plan for the upgrade.</td>
</tr>
</tbody>
</table>

### VMware vSphere - Upgrade

<table>
<thead>
<tr>
<th>Specification</th>
<th>Parameters</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>VMware vCenter Server® 6.7 or vCenter Server 7.x upgrades</td>
<td>Up to two (2)</td>
<td>Upgrades to vCenter Server 7.x performed.</td>
</tr>
<tr>
<td>VMware ESXi™ 6.7 or 7.x host upgrades</td>
<td>Up to sixteen (16)</td>
<td>ESXi host upgrades to 7.x.</td>
</tr>
<tr>
<td>VMware Tools upgrades</td>
<td>Up to fifty (50)</td>
<td>VMware Tools upgrades.</td>
</tr>
<tr>
<td>Virtual machine hardware upgrades</td>
<td>Up to fifty (50)</td>
<td>Virtual Machine hardware upgrades.</td>
</tr>
<tr>
<td>Virtual Machine File System (VMFS) volume upgrades</td>
<td>Up to one (1)</td>
<td>VMFS volume upgrades.</td>
</tr>
<tr>
<td>VMware vSAN Clusters upgrades</td>
<td>Up to two (2)</td>
<td>vSAN cluster upgrades performed.</td>
</tr>
</tbody>
</table>
### VMware NSX - Upgrade

<table>
<thead>
<tr>
<th>Specification</th>
<th>Parameters</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of NSX Manager clusters</td>
<td>Up to two (2)</td>
<td>NSX Managers upgraded.</td>
</tr>
<tr>
<td>Number of Transport nodes (ESXi)</td>
<td>Up to sixteen (16)</td>
<td>Number of transport nodes in scope.</td>
</tr>
<tr>
<td>Number of NSX Edges</td>
<td>Up to two (2)</td>
<td>Number of NSX Edges in scope.</td>
</tr>
</tbody>
</table>

### VMware Cloud Director – Upgrade

<table>
<thead>
<tr>
<th>Specification</th>
<th>Parameters</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>VMware Cloud Director 10.x Upgrades</td>
<td>Up to one (1)</td>
<td>VMware Cloud Director Appliance upgrades from VMware Cloud Director 10.x to latest VMware Cloud Director 10.x Appliance.</td>
</tr>
<tr>
<td>Total number of VMware Cloud Director cells</td>
<td>Up to three (3)</td>
<td>Number of cells upgraded</td>
</tr>
</tbody>
</table>

### VMware Aria Operations for Logs

<table>
<thead>
<tr>
<th>Specification</th>
<th>Parameters</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of VMware Aria Operations for Logs instance</td>
<td>Up to one (1)</td>
<td>Instance of VMware Aria Operations for Logs connected to VMware Cloud Director to be upgraded</td>
</tr>
</tbody>
</table>

### VMware Aria Operations

<table>
<thead>
<tr>
<th>Specification</th>
<th>Parameters</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of Instances</td>
<td>Up to one (1)</td>
<td>VMware Aria Operations Instance connected with VMware Cloud Director</td>
</tr>
</tbody>
</table>
**VMware Aria Operations Tenant App Service**

<table>
<thead>
<tr>
<th>Specification</th>
<th>Parameters</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of Instances</td>
<td>Up to one (1)</td>
<td>VMware Aria Operations Tenant App Service Instance connected with VMware Cloud Director</td>
</tr>
</tbody>
</table>

**VMware Aria Operations for Networks**

<table>
<thead>
<tr>
<th>Specification</th>
<th>Parameters</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of VMware Aria Operations for Networks Instances</td>
<td>Up to one (1)</td>
<td>VMware Aria Operations for Networks Instance connected with VMware NSX used by VMware Cloud Director</td>
</tr>
</tbody>
</table>

**Estimated schedule**

VMware estimates that the duration of service described will not exceed 10 weeks. VMware Professional Services will operate according to a schedule agreed to by both parties. Typically, professional services are performed during normal business hours and workdays (weekdays and non-holidays).

**Out of scope**

The following are out of scope items for the defined project workstream:

**General**

- Installation and configuration of custom or third-party applications and operating systems on deployed virtual machines
- Operating system administration including the operating system itself or any operating system features or components
- Management of change to virtual machines, operating systems, custom or third-party applications, databases, and administration of general network changes within Customer control
- Remediation work associated with any problems resulting from the content, completeness, accuracy, and consistency of any data, materials, or information supplied by Customer
- Installation or configuration of VMware products not included in the scope of this document
- Installation and configuration of third-party software or other technical services that are not applicable to VMware components
- Installation and configuration of Customer-signed certificates
• Configuration of VMware products used for the service other than those implemented for the mutually agreed-to-use cases
• Customer solution training other than the defined knowledge transfer session
• Creation of user roles and groups
• Creation of local accounts
• Configuration of additional LDAP/Active Directory sources
• vCenter Content library creation, OS images creation/Copy/Sync
• Creation of Networking segments, VPNs, and additional firewall rules not included in the specific service scope

**Upgrades**
• Other Source OSes (Linux or Windows) to appliances are out of scope
• Backups of the appropriate servers (vCenter Server, the Platform Services Controller, ESXi hosts, VMs, Cloud Direct Instances and other VMware Appliances) prior to start upgrades
• Implementation of new features as a part of the upgrade
• Identification and/or upgrade of third-party components (automation, virtual desktop infrastructure, backup software, or the like) for the environment
• Changing from external Platform services controller deployment to embedded
• Remediation work associated with custom scripts or workflows
• Any work associated with removal or configuration of vCenter HA prior/after patching vCenter

**Project Activities**

**Phase 1: Initiate**
VMware hosts a project initiation call with key Customer and VMware stakeholders.

Topics to be discussed include:
• Project business drivers, workstream scope identification, and objectives
• Project deadlines, timelines, scheduling, and logistics
• Identification of key Customer team members who VMware will work with to accomplish the tasks defined in this project
• Technology prerequisites necessary for a successful project, including review of the Service Checklist for the VMware solution
• Confirmation of team members and contact details will be exchanged to schedule the project kickoff meeting

Deliverables include:
• Initial pre-engagement call
Phase 2: Plan
VMware leads a project kickoff meeting with Customer to assess prerequisite completion readiness, review the VMware standard architecture, and confirm project milestone dates.

The objectives of the meeting are as follows:

• Introducing the VMware team, roles, and responsibilities
• Describing the project goals, phases, and key dates
• Explaining the expected project results and deliverables
• Agreeing on communication and reporting process
• Validating the project expectations and clarifying roles and responsibilities

After Customer and VMware agree on project expectations, the VMware Project Manager and the Customer Project Manager work together on the detailed project plan.

Deliverables include:

• Project kickoff meeting minutes
• Plan and Upgrade kickoff presentation

Phase 3: Assess
The key activities for this phase are organized into Assessment and Knowledge Transfer subphases.

In the Assessment subphase VMware does the following:

• Review current environment
• Prepare an assessment report
• Present the upgrade plan

In the Knowledge Transfer subphase, VMware conducts knowledge transfer sessions covering the overall architecture, assessment procedures, and operations procedures relating to the technologies in the scope. VMware does the following:

• Conducts technical knowledge transfer for administrators and operators during the activities
• Conducts up to 4 hours of knowledge transfer session

Phase 4: Upgrade
VMware performs the upgrade of the identified software components from the current to the prescribed version.

Deliverables included:

• Upgrade Plan Workbook
• Validation of Upgraded components
Phase 5: Close

VMware conducts a closure meeting of up to 4 hours with the Customer covering project status, reviewing completions, next steps and how to engage with VMware support.

Deliverables included:

• Engagement summary presentation
Appendix

The following Customer stakeholders are required to participate during the delivery of project activities:

- VMware Operations team leads
- Security Policy team leads
- Enterprise Architect
- Infrastructure Architect
- Network Operations team leads
- Network Architecture team leads

Requirements

Please verify product requirements and interoperability with the following links:
