

VMware Technical Adoption Management Services for End User Computing

Accelerate solution time to value

At a glance

VMware Technical Adoption Management Services™ for End User Computing provide your organization with a VMware subject matter expert, advocate and advisor who will equip your organization with proven methodologies and exclusive tools to keep your VMware initiatives on track.

Key benefits

- Accelerate time to value of your VMware Anywhere Workspace strategy.
- Increase IT staff knowledge and abilities.
- Optimize operations to realize cost savings.
- Reduce operational risk with technology assessments and best practice guidance.
- Keep pace with rapid technology changes.
- Participate in exclusive events.

Business challenge

Companies today are looking to provide end user computing solutions with greater flexibility; enabling employees to work from anywhere, using their preferred devices, while still ensuring effective security. Providing an employee-centric digital workspace is critical to supporting new business initiatives, with the shift to more distributed, remote teams, while fostering better ways to securely connect people with corporate resources.

To meet these challenges, organizations are choosing innovative solutions from VMware. Leveraging a VMware technology expert can help maximize the value of your investments quickly while reducing risk and cost.

Overview

Technical Adoption Management Services for End User Computing are designed to ensure your organization is prepared to take full advantage of your VMware Anywhere Workspace technology investments, optimize operations, and keep pace with rapid technology changes. A VMware subject matter expert, advocate, and advisor equips your organization with proven methodologies and exclusive tools to keep your initiatives on track. Activities include:

- Success planning to identify your business and IT outcomes along with recommendations for technical capabilities and activities needed for success.
- Technology assessment to identify gaps impeding your progress and provide prioritized recommendations for improvements through:
 - Best practice, interoperability, and compatibility reviews
 - Technical Readiness Assessment
- Solution guidance to develop a future state roadmap that advances your technology objectives based on the assessment of your capabilities and goals.
 - Guidance to scale out your environment.
