

# Knowledge and Skills Assessment™

## Assessment Overview

The Knowledge and Skills Assessment is our complimentary service that allows you and your team to understand and identify existing strengths and skill gaps for your VMware solutions across the whole IT organization.

It provides insight into and delivery of:

The current state of your IT team's VMware skill gaps and strengths

Tailored learning paths for short and long-term IT project success

Deeper IT skills analysis based on current or future job role / persona

## The Assessment Process in EMEA

(Europe, Middle East and Africa)

### 1 Identify

A VMware Learning expert will schedule a meeting to understand your business or project-specific objectives.

### 2 Collect

Your team fill out the survey so we can collect the data for initial analysis and validation.

### 3 Interpret

During a deep dive discussion with your team, we interpret the results based on your priorities.

### 4 Report

The assessment's analysis and custom Learning proposal will be presented by your VMware Learning expert.

## Benefits of the Assessment

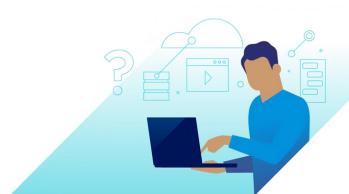

Maximize value of your technology

Set up your team for success

Get targeted training that supports your team

Be ready for your next VMware project
