

VMware vRealize Cloud Universal Enterprise Plus with VMware Cloud Universal

Key Benefits:

 Offers a deep portfolio of cross-cloud management & operations

 Provides flexible purchasing and consumption

 Empowers your business to move at your own pace

Unify flexible cloud management across private, public, and local environments

VMware vRealize® Cloud Universal™ is a software-as-a-service (SaaS) management suite with various designed to accelerate cloud evolution by combining on-premises and SaaS capabilities for automation, operations, log analytics, and network visibility into a single offering. VMware vRealize Cloud Universal offers several service tiers based on the breadth and scope of cloud management capabilities needed.

VMware Cloud Universal™ is VMware's strategic, SaaS-driven program to accelerate digital and Multi-Cloud transformation for customers. VMware Cloud Universal combines financial flexibility with VMware's industry-leading on-premises, private, public, and local cloud solutions. The program is tailored to accelerate customers' desired outcomes, including interoperable VMware Cross-Cloud Services such as modernizing applications and unifying cloud management. **The vRealize Cloud Universal Enterprise Plus service tier is purpose-built for interoperability with VMware Cloud Universal.**

VMware vRealize Cloud Universal Enterprise Plus solution overview

vRealize Cloud Enterprise Plus is the highest service tier available to offer comprehensive, industry-leading cloud management capabilities. It is designed to accelerate cloud evolution by combining on-premises and SaaS capabilities for automation, operations, log analytics, and network visibility into a single offering. It gives the flexibility to deploy on-premises or as SaaS interchangeably, without the need to repurchase, for a consistent hybrid and multi-cloud management experience. The flexible licensing and delivery models enable organizations to move at their own pace, helping them to become more agile, scalable, and efficient.

Figure 1 summarizes the vRealize Cloud Universal Enterprise Plus solution topography. Available products offered through vRealize Cloud Universal Enterprise Plus can be purchased either on a per-product(s) basis or as an integrated solution portfolio.

Why vRealize Cloud Universal?

Combine SaaS and on-premises capabilities for automation, operations, log analytics, network visibility, security and compliance into one license

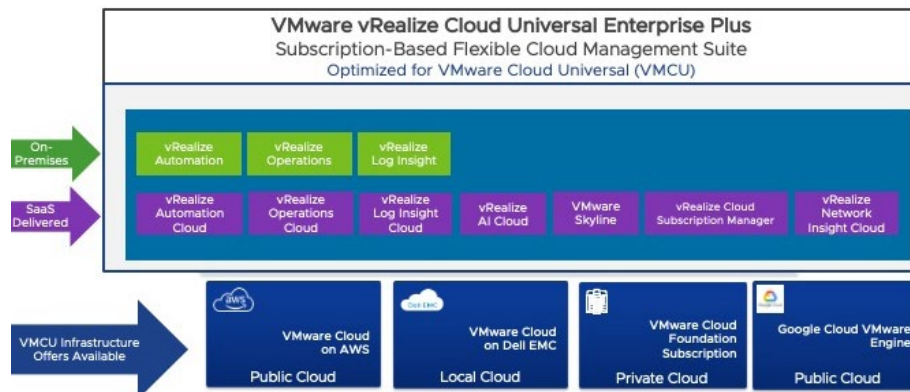

Figure 1: VMware vRealize Cloud Universal Enterprise Plus Offering with Available VMware Cloud Universal Infrastructure

vRealize Cloud Universal Enterprise Plus includes the following VMware products:

- **VMware vRealize Automation™ and vRealize Automation Cloud™** – Enables self-service catalog, governance, provisioning, orchestration, and DevOps-based service delivery from a modern infrastructure automation platform
- **VMware vRealize Operations™ and vRealize Operations Cloud™** – Delivers continuous performance optimization, efficient capacity management, proactive planning, intelligent remediation, and integrated compliance powered by AI and predictive analytics
- **VMware vRealize Log Insight™ and vRealize Log Insight Cloud™** – Delivers centralized log management, deep operational visibility, and intelligent analytics
- **VMware Skyline™** – Provides proactive intelligence that helps organizations avoid problems before they occur and reduces the time spent on resolving active support requests

vRealize Cloud Universal Enterprise Plus also includes powerful SaaS-only capabilities spanning:

- **VMware vRealize AI Cloud™** – Provides reinforcement learning to learn, adapt and optimize storage KPIs across mixed application workloads
- **VMware vRealize Cloud Federated Catalog™** – Delivers a unified catalog of IT infrastructure resources to end-users globally
- **VMware vRealize Cloud Federated Analytics™** – Enables a unified view of hybrid and multi-cloud environments in a single interface
- **VMware vRealize Cloud Subscription Manager™** – Delivers automated license usage metering from vRealize deployments, both on-premises and in the cloud
- **VMware vRealize Network Insight Cloud™** – Available only within the vRealize Cloud Universal Enterprise Plus offering, this solution enables acceleration and optimization of application security and networking across private, public, local, and hybrid clouds.

Benefits when integrated with VMware Cloud Universal

vRealize Cloud Enterprise Plus, when combined with VMware Cloud Universal, empowers your business to accelerate productivity, cost savings, and business outcomes in multi-cloud and hybrid environments. Now you can incorporate a unified cloud management plane span cloud automation, operations, federation, security, and analytics. The chart below outlines common cloud management challenges in a multi-cloud or hybrid environment and how VMware provides solutions for long-term success.

Challenge	Solution: vRealize Cloud Universal Enterprise Plus & VMware Cloud Universal
Multiple cloud silos Single source of truth and the ability to report to management on the overall state of cloud infrastructure	Accelerate agility Unlock innovation by speeding up delivery of infrastructure, applications, and services in a single license
Rising cloud costs Optimize costs and free up cash for core business functions by shifting from a CapEx to OpEx model	Optimize performance Maximize efficiency by delivering end-to-end intelligent operations at scale without the need to repurchase
Security and compliance Drive rapid business transformation while delivering enterprise-level resiliency, security, and operations	Control your clouds Mitigate risks by simplifying financial management, strengthening security, and automating governance across private, public, local clouds, and hybrid/on-premises environments
Operational continuity Transition on-premises workloads to SaaS at a pace that matches the needs of the business	Freedom of choice Consistently manage any cloud, infrastructure, and application on-prem or as SaaS

Why vRealize Cloud Enterprise Plus and VMware Cloud Universal?

- **Flexibility:** Deploy and consume vRealize components either on-premises or SaaS with VMware Cloud Universal public, private, local infrastructure options.
- **Value:** Redeem the value of unused on-premises entitlements through a one-time Cloud Acceleration Benefit, an offer exclusive to VMware Cloud Universal
- **Scalability:** Manage resources in a SaaS consumption model
- **Multi-cloud and hybrid interoperability:** Ensure security, efficiency, governance, and continuous operations across on-premises/local, private, public, local cloud environments
