Carbon Black.

Freeport LNG Leverages CB Response for Comprehensive Enterprise Visibility

INDUSTRY

Manufacturing

COMPANY SIZE

150+ employees

SECURITY CHALLENGES

+ No security team set up at the start

PRODUCT

CB Response

KEY BENEFITS

+ Does the work of a 24/7/365 SOC Analyst

+ Conduct business safely while minimizing risk

Summary

When Todd Beebe, an information security officer for Freeport LNG, was asked if he would consider using a different cybersecurity solution other than Carbon Black, his answer was clear.

"(CB Response) is a no-brainer versus what else is in the market," he said. Beebe cited that CB Response empowers his organization to do the work of 24/7/365 team of first-level analysts.

Evaluation/Implementation

Upon arriving at Freeport LNG, the first thing Beebe requested for his department was to bring on CB Response. With no team set up just yet, Beebe would have to do the same amount of security analysis required by a full-time staff, and he knew CB Response would be there for him with the visibility the company needed.

Although Beebe had previous experience with CB Response and knew of its security capabilities, Freeport LNG made sure to evaluate CB Response against Carbon Black's competitors. The competition failed during their evaluation; no product could match the threat hunting and incident response capabilities of CB Response. .

CB Response is always on

According to Beebe, CB Response is always on, much like a "24/7/365 SOC analyst" and serves as an insurance policy with its threat hunting and incident response ability.

"It's a no brainer versus what else is in the market."

Todd Beebe, Information Security Officer, Freeport LNG

Beebe notes that CB Response empowers his team and company to conduct business safely while minimizing risk. With a small security team, Freeport LNG can smartly monitor their network, responding immediately when CB Response notifies of an alert, rather than spending hours reviewing logs. Freeport LNG has made it a requirement that every company endpoint, from domain controllers to sensitive systems, be equipped with CB Response. "(We) are very happy with Carbon Black," Beebe said.

About Carbon Black

Carbon Black is a leading provider of next-generation endpoint security. Carbon Black serves more than 3,700 customers globally, including 30 of the Fortune 100. As a cybersecurity innovator, Carbon Black has pioneered multiple endpoint security categories, including application control, endpoint detection and response (EDR), and next-generation antivirus (NGAV). Leveraging its newly introduced big data and analytics cloud platform – the CB Predictive Security Cloud – Carbon Black solutions enable customers to defend against the most advanced cyberthreats, including malware, ransomware, and non-malware attacks. Deployed via the cloud, on premise, or as a managed service, customers use Carbon Black solutions to lockdown critical systems, hunt threats, and replace legacy antivirus.
