

# Simplify DevOps for VMware Virtualized SAP Landscapes

## VMware Adapter for SAP LVM

The VMware Adapter for SAP Landscape Virtualization Management (LVM) empowers SAP Basis Administrators to rapidly clone, copy, refresh, mass stop and start, and migrate SAP systems between hosts, storage, and network devices with SAP LVM and VMware virtual infrastructure.

SIMPLE!

### FEATURES:

**1** Single pane-of-glass provisioning and operations

**2** Simplification of infrastructure management

**3** Workload and capacity management

**4** Automated operations

### BENEFITS:

 **Reduce** time spent operating SAP systems

 Get to market **faster**

 **Lower** your total cost of ownership (TCO)

 **Reduce** functional errors

 **Increase** operational agility

 **Respond quickly** to workload fluctuations

 **Accelerate** application lifecycle management
