

Hitachi Vantara and VMware 5 Ways To Transform IT Agility With Deep VMware Integrations

When you're about to embark on your biggest step in your digital transformation journey, you need partners with the breadth to help.

Together Hitachi Vantara and VMware deliver an agile ecosystem that combines their world-class expertise with the innovation to support your IT modernization journey.

To take the next step, uncover five ways we can transform your organization with pre-engineered, certified solutions.

01 Improve IT service delivery time

Accelerate your data center modernization with Hitachi Unified Compute Platform Advisor (UCP Advisor) - the management automation platform that simplifies IT management and orchestration.

- Speeds deployment of hyperconverged systems by six to eight times, from six days to three to four hours, by automating 600+ day-0 tasks.
- Helps administrators get started faster without the need to learn additional management tools.

02 Simplify cloud operations

Accelerate your cloud deployments, lower the cost of cloud management and reduce risks with best-in-class private and hybrid cloud capabilities with Hitachi Enterprise Cloud (HEC).

- Ensure applications are available with complete end-to-end solutions.
- Consolidate your virtualized and non-virtualized workloads.

03 Reduce TCO and infrastructure complexities

Cut operational costs with Hitachi Vantara and VMware's advanced technologies.

- Lower IT infrastructure complexities.
- Automated management, monitoring and provisioning.

04 Maximize return on IT investments

Unlock uninterrupted business operations and maximize the value for your applications with Hitachi Virtual Storage Platform (VSP).

- Maximize virtual machine density with industry-leading, high-performance storage solutions.
- Optimize IT performance and improve resource utilization with advanced infrastructure analytics.

05 Unlock greater flexibility

Achieve unmatched reliability, flexibility, automation and performance of your most demanding workloads with Hitachi Unified Compute Platform (UCP).

- Automates onboarding, configuration and provisioning for faster access to IT infrastructure.
- Enables scalable software-defined data centers with Hitachi hyperconverged infrastructure and VMware Cloud Foundation.

Streamlined Solutions: Hitachi Unified Compute Platform (UCP) and VMware

Welcome to the future of hyperconvergence. Unleash the possibilities of...

3x

higher performance

100%

availability

6x

reduction in latency

Agility from Edge to Cloud

"The performance of the environment is astronomically good, we immediately experienced high availability of the environment and there were virtually no headaches in the deployment. Furthermore, the performance between the old and the new can't even be compared. The migration ran smoothly and the developers working in the environment are over the moon with the speed at which everything runs."

Lee Engelbrecht, Technical Manager, Dis-Chem
