

Better together

HP ConvergedSystem and VMware

Free up your IT resources with a software-defined data center

A software-defined data center gives you and your organization increased agility, flexibility, and manageability. But to get there, you need a faster, easier, more effective way to deliver a virtualized environment.

HP and VMware are at the forefront of this trend. Here's why the HP ConvergedSystem delivers the business agility that enables you to quickly adapt to market and customer needs. The combined solution gives you the power to be:

Fast

Reduce time to insight and action through speed of deployment and provisioning

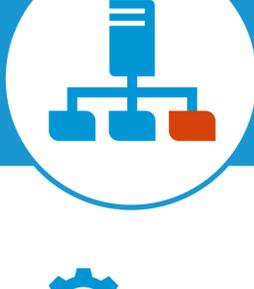

Simple

Easily stand up and manage net new services for your business partners

Efficient

Refocus your investments on innovation, not operations, by lowering the total cost of ownership (TCO) of your most critical workload solutions

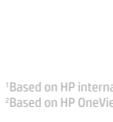

HP OneView integrated with vCenter

Configure servers up to **9 times faster**¹

Clone virtual machines in seconds

Deploy a VMware vSphere cluster in **five easy steps**

Complete management and provisioning tasks up to **12 times faster**²

¹Based on HP internal testing of HP OneView vs. manual operations, September 2013

²Based on HP OneView analysis

Enterprise-level performance

For demanding data centers, HP ConvergedSystem 700 delivers faster time-to-value

Reduce TCO by up to

40%

Up to **315% ROI**

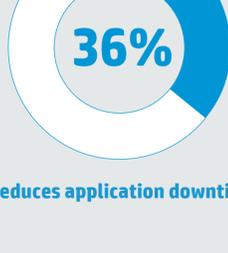

Single point of accountability

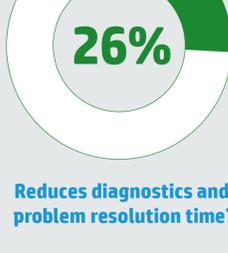

Resolve problems up to **66% faster**

Boost productivity with vSOM

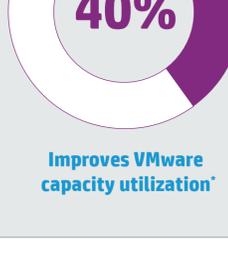

No one but HP includes vSphere with Operations Management (vSOM) as a standard offering

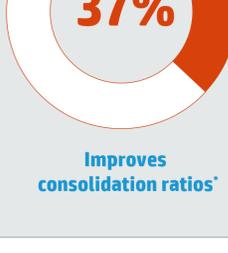

Reduces application downtime*

Reduces diagnostics and problem resolution time*

Improves VMware capacity utilization*

Improves consolidation ratios*
