

HP Reference Architecture for Mobile Care with VMware AlwaysOn

Better user experience, better benefits

Enabling anywhere, anytime information access

- Access patient information 24x7 at the point of care

Increasing clinicians' productivity

- Support end-user mobility, providing a consistent native desktop experience on any device

Ensuring security and mitigating risks

- Enable regulatory compliance with a highly available, protected infrastructure
- Reduce risk with proven reference architectures that include HP BladeSystem with Virtual Connect, HP 3PAR StoreServ Storage, and HP networking
