

Thrive in a Multicloud Environment

67%

of enterprises anticipate relying on **multiple clouds**.¹

71%

of enterprises have adopted **hybrid cloud**.²

17%

of enterprises now have **more than 1,000 VMs** in the public cloud.²

Cloud-Adoption Challenges

Managing **cloud spend**

Security and **compliance** consideration

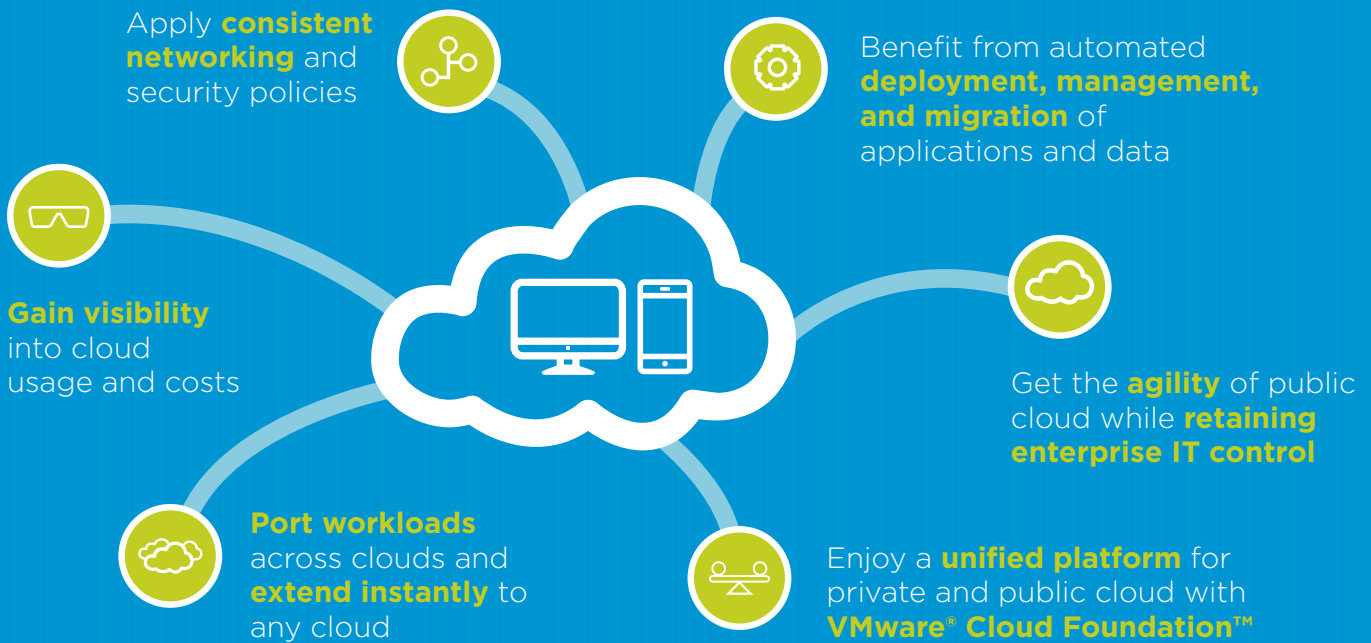

Extensibility across legacy and **cloud-native applications**

Seamless management across on-premises and different cloud resources

VMware Cloud Leadership

VMware SISO Advantage

The VMware Cross-Cloud Architecture™ enables system integrators and system outsourcers (SISOs) to give customers:

The strongest, most flexible **multicloud strategy**

Extend **consistent security and regulatory compliance** with a common operating and management environment

Enterprise IT control with the ability to **run, manage, connect, and secure** applications across clouds and devices

The freedom and flexibility of an integrated **hybrid cloud environment**
