

Embrace Unfettered Efficiency

53%

of enterprises say mobility increases workforce effectiveness.¹

27%

AAGR predicted in enterprise mobility management market through 2020.²

~1.5

billion new devices were shipped in 2016.³

Mobility Challenges

Ensuring secure connections to corporate resources across variety of devices.

Performing lifecycle management across applications, devices and users.

Managing Windows 10 adoption and new capabilities.

Adhering to **compliance requirements** without compromising user experience.

VMware Mobility Leadership

VMware® provides a complete digital workspace through VMware Workspace ONE™ that:

Supports full app lifecycle from development to deployment with integrated identity

Automates processes and delivers intelligent insights

Protects corporate apps and data on any network

Allows IT to **manage all endpoints** in a single solution, including Windows 10

VMware SISO Advantage

The Workspace ONE platform enables system integrators and system outsourcers (SISOs) to give customers:

A digital workspace that **reduces time to market** for mobile apps

End-to-end protection for applications, data, and devices

Enhanced **workforce productivity**

Workspace ONE platform

Reduced CapEx and OpEx

Easy management and centralized **control of Windows 10 devices**
