

Capgemini & VMware Partnership

Accelerate Your Journey Toward Everything-as-a-Service (XaaS)

Why VMware & Capgemini

Accelerate to a cloud-first workflow

Get flexible, scalable, cloud solution to drive enhanced business outcomes and new business models

Get the competitive edge in the era of disruption

Apply innovation at the speed and scalability that works for you, at a secure and sustainable manner

Reduce the time to market and increase profitability

From creating a clear strategy to executing efficiently in optimized priority, you need a trusted partner that understands your world

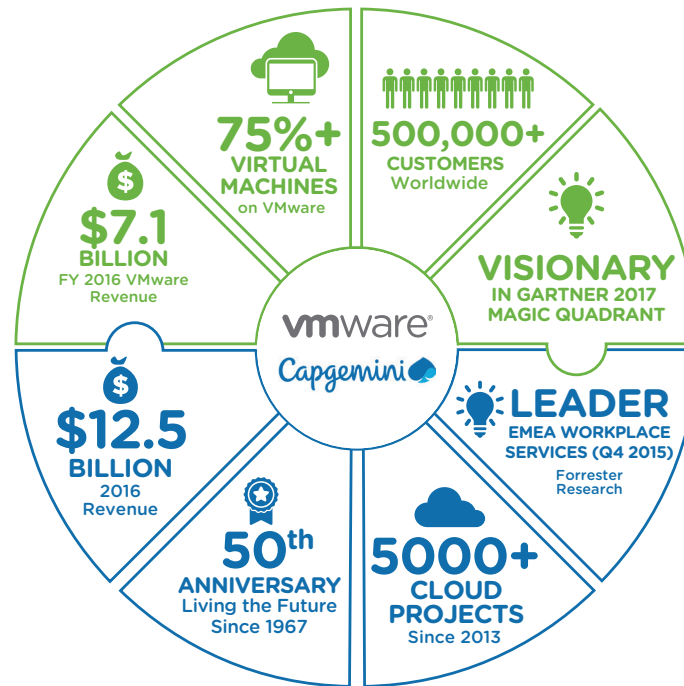

Improve productivity

Deliver an enhanced user experience with anytime, anywhere access to integrated apps, data and value-added services

Leverage expertise and experience

More than 190,000 industry experts for increased business performance and competitive differentiation

“Our customers increasingly want portability for their workloads across private and public cloud environments, while using industry-leading platforms. The VMware Cloud on AWS offering, in combination with the VMware Cloud Foundation model, is well positioned to help companies achieve their hybrid cloud and workload migration goals for business-critical systems.”

Joe Coyle

Executive Vice President, Global Chief Technology Officer, Cloud Services, Capgemini
