

HPE Sizer for VMware ESXi on HPE Synergy Platform

Solution Sizer Overview

Hewlett Packard Enterprise Solution Sizers are automated tools that assist with recommending a solution environment. Sizers are downloaded and run on the user's personal computer. Updates with the latest information on Hewlett Packard Enterprise hardware and solution software are available automatically when the user is connected to the Internet and may optionally be installed by the user.

Features of the HPE Sizer for VMware ESXi on HPE Synergy Platform

The HPE Sizer for VMware® ESXi on HPE Synergy Platform is an automated, downloadable tool that provides quick and helpful sizing guidance for VMware ESXi host specifications. HPE Synergy, the world's first platform architected for Composable Infrastructure, is a new category of infrastructure that accelerates application delivery in both traditional and new IT environments.

The HPE Sizer for VMware ESXi on HPE Synergy Platform assists users with the size and scope of their VMware server environments. It enables the user to quickly provide their configuration requirements and produces a customizable solution configuration. The tool gives you full detailed specifications including a complete BOM with pricing.
