

Move to a Secure, Hybrid Cloud with VMware and Infosys—World Leaders in Virtualization and Cloud Innovation

BENEFITS

Industry-leading cloud technologies

- VMware's industry-leading Software-Defined-Data Center (SDDC) architecture unifies best-in-class compute, storage, and networking virtualization to deliver your hybrid cloud.

Proven expertise and experience

- With thousands of clients in over 50 countries, Infosys enables transformation through strategic consulting, operational leadership, and the co-creation of mobility, Big Data, and cloud computing solutions.

Fast, simple workload migration

- Built on VMware's Software-Defined Data Center, Infosys' Hybrid IT cloud platform ensures seamless, transparent, and secure workload migration.

Deep vertical and SAP experience

- Infosys leverages deep vertical and SAP expertise to define, build, and manage SAP ERP and SAP HANA deployments in the cloud.

Global, VMware-certified resources

- Infosys has over 3,000 VMware-certified resources worldwide with expertise in deploying IT-as-a-Service (ITaaS) on VMware technologies.
- Infosys supports over 100,000 users on SAP HANA private clouds built with VMware virtualization technologies.

As leaders in innovation, VMware and Infosys have the technology and services you need to build, deploy, and manage a secure, hybrid cloud to ensure competitive differentiation and drive business growth. With satisfied customers around the world, we can ensure the success of your cloud transformation journey by reducing risk and accelerating the migration of your business to the cloud.

A smooth path to hybrid cloud

Building on industry-leading virtualization and cloud infrastructure innovations, Infosys and VMware leverage global capabilities to help you move to a secure, hybrid cloud to optimize efficiencies, reduce costs, and accelerate time-to-market.

Infosys' Hybrid IT provides a unified cloud services platform built on VMware's industry-leading Software-Defined Data Center architecture with best-in-class compute, storage, and networking virtualization, provisioned and managed using Infosys Infrastructure Management Platform.

A full portfolio of Infosys services offers the seamless deployment, migration, and management of secure, business-critical workloads and applications in your hybrid cloud to ensure the governance, risk management, and compliance you need.

Hybrid IT

Infosys Hybrid IT enables you to quickly build and deploy a unified, hybrid cloud Infrastructure-as-a-Service (IaaS) with seamless manageability.

- Increase business agility with integration of applications and data within a unified hybrid cloud spanning private, public, and managed clouds
- Maximize flexibility by moving the right workloads and applications to the cloud

Infosys Workload Migration Across Hybrid IT

Infosys Workload Migration Across Hybrid IT leverages the deep SAP and vertical expertise and migration capabilities of Infosys to migrate business-critical workloads to a hybrid cloud.

The IaaS solution helps you seamlessly and quickly migrate mainframe, UNIX, Microsoft Windows, Linux, or SAP ERP and SAP HANA workloads and applications to the cloud. It enables you to improve agility and meet SLAs by scaling on demand and expanding and contracting resources as needed.

Migrating business-critical workloads to a hybrid cloud built on proven VMware technologies optimizes efficiencies, reduces costs, and accelerates transformation, enabling businesses to deliver cloud economics at scale.

Infosys Security Across Hybrid IT

Infosys Security Across Hybrid IT offers reference architectures developed around governance, risk, assurance, and compliance (GRA), enabling you to build secure cloud architectures and processes for hybrid clouds built on VMware technologies.

- Secure applications and data across hybrid clouds
- Mitigate risk and improve ROI for new business innovation
- Increase productivity and refocus IT resources on innovation projects driving new business value versus ongoing operations

Infosys security services offers cloud assurance and ensures a dedicated and secure cloud platform built from the ground up to support the governance and control your business demands.

Leverage innovation, experience and expertise

Together, Infosys and VMware have built an industry-leading portfolio of Hybrid IT solutions leveraging VMware's innovative Software-Defined Data Center architecture and complemented by a full portfolio of deployment, migration, and management services for a complete, end-to-end IT transformation.

We have the technology and expertise you need to quickly build and deploy a unified, hybrid cloud services platform to enable efficient DevOps and support the migration of legacy applications.

And Infosys' deep vertical expertise and migration, integration, and management services ensure that each cloud is tailored and optimized to meet the specific needs of your business.

Infosys: Services to outperform the competition

Infosys is a global leader in consulting, technology, outsourcing, and next-generation services. We enable clients in more than 50 countries to stay a step ahead of emerging business trends and outperform the competition. We help them transform and thrive in a changing world by co-creating breakthrough solutions that combine strategic insights and execution excellence.
