

vCenter Site Recovery Manager 5.0 VPAT©

November 3, 2011

VPAT®

Since the VPAT must be comprehensive, all Section 508 issues on all pages must be corrected to sustain compliance.

Criteria	Supporting Features	Remarks and Explanations
Section 1194.21 Software Applications and Operating Systems	Supports with Exceptions	Please refer to the 1194.21 section for details.
Section 1194.22 Web-based Intranet and Internet Information and Applications	Not Applicable	Does Not Support
Section 1194.23 Telecommunications Products	Not Applicable	Not Applicable
Section 1194.24 Video and Multi-media Products	Not Applicable	Not Applicable
Section 1194.25 Self-Contained, Closed Products	Not Applicable	Not Applicable
Section 1194.26 Desktop and Portable Computers	Not Applicable	Not Applicable
Section 1194.31 Functional Performance Criteria	Supports with Exceptions	Please refer to the 1194.31 section for details.
Section 1194.41 Information, Documentation, and Support	Supports	Please refer to the 1194.41 section for details.

Support Levels

Support Level	Description
Supports	Use this language when you determine the product fully meets the letter and intent of the Criteria.
Supports with Exceptions/Minor Exceptions	Use this language when you determine the product does not fully meet the letter and intent of the Criteria, but provides some level of access relative to the Criteria.
Supports through Equivalent Facilitation	Use this language when you have identified an alternate way to meet the intent of the Criteria or when the product does not fully meet the intent of the Criteria.

Support Level	Description
Supports when combined with Compatible AT	Use this language when you determine the product fully meets the letter and intent of the Criteria when used in combination with Compatible Assistive Technology ("AT"). For example, many software programs can provide speech output when combined with a compatible screen reader (commonly used AT for people who are blind).
Does Not Support	Use this language when you determine the product does not meet the letter or intent of the Criteria.
Not Applicable	Use this language when you determine the Criteria does not apply to the specific product.
Not Applicable - Fundamental Alteration Exception Applies	Use this language when you determine a Fundamental Alteration of the product would be required to meet the Criteria (see the access board's standards for the definition of "fundamental alteration").

§1194.21 Software Applications and Operating Systems

Criteria	Support Level	Remarks and Explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Supports with Exceptions	Interfaces are keyboard accessible with some exceptions. A mouse or other pointing device is required to reach, activate and/or select. Keyboard and JAWS users cannot reach main tabs and some links.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Supports with Exceptions	Site Recovery Manager 5.0 does not cause interference with activated or available accessibility features of other products or operating systems with some exceptions. Tabs and content under “Summary” tabs remain the same colors even after a user selects the Windows High Contrast option.
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes. (Related to well-defined focus control which will also be visually indicative).	Supports with Exceptions	The current focus can be tracked visually or through assistive technologies with exceptions. Visual focus is not shown on links with white backgrounds.
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program	Supports with Exceptions	Some interfaces and/or graphic components do not have information exposed to assistive technologies. For example, the names of some column headers and items in data tables, buttons in the Navigation pane and text

Criteria	Support Level	Remarks and Explanations
element, the information conveyed by the image must also be available in text.		under some “Summary” tabs are not exposed to JAWS. JAWS says “read-only” when users tab to active links.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Supports	Images to identify user interfaces and other components have consistent meanings throughout Site Recovery Manager 5.0.
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Supports with Exceptions	Site Recovery Manager 5.0 allows textual information to be provided through operating system functions with some exceptions. JAWS does not read the name of any dialog window when it is launched.
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Supports with Exceptions	Site Recovery Manager 5.0 honors user-selected display attributes with some exceptions. Tabs and content under “Summary” tabs remain the same colors even after a user selects the Windows High Contrast option.
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user. (Animation)	Not Applicable	Site Recovery Manager 5.0 does not have animation.
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Supports with Exceptions	Site Recovery Manager 5.0 has textual and/or programmatically implemented equivalents when color-conveyed information is displayed to indicate an action, identify an element or require a response with some exceptions. Exceptions include selected tabs.
(j) When a product permits a user to adjust color and contrast settings, a variety of color	Not Applicable	Site Recovery Manager 5.0 does not have settings to adjust color contrast.

Criteria	Support Level	Remarks and Explanations
<p>selections capable of producing a range of contrast levels shall be provided.</p>		
<p>(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.</p>	<p>Supports</p>	<p>Site Recovery Manager 5.0 does not have content that flashes or blinks with a frequency greater than 2 Hz and lower than 55 Hz.</p>
<p>(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Supports with Exceptions</p>	<p>Assistive technologies, such as screen readers, may not identify and navigate to all of the form elements in the application to complete and submit forms.</p>

§1194.31 Functional Performance Criteria

Criteria	Support Level	Remarks and Explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Supports with Exceptions	Some information retrieval processes and/or operations require vision and may not provide support for assistive technologies.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Supports with Exceptions	Some information retrieval processes and/or operations require vision acuity greater than 20/70 and may not provide support for assistive technologies.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	Supports	Site Recovery Manager 5.0 does not require hearing for information retrieval and operations. Support for hearing devices may be provided.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Not Applicable	Site Recovery Manager 5.0 does not have audio information.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	Supports	Site Recovery Manager 5.0 does not require speech for information retrieval or operations. Support for assistive technologies may be provided.
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and	Supports with Exceptions	Site Recovery Management 5.0 does not require fine motor control or simultaneous actions. Persons with dexterity impairments can perform product operations with some

Criteria	Support Level	Remarks and Explanations
strength shall be provided.		exceptions. Exceptions include main tabs and some links.

§ 1194.41 Information, Documentation, and Support

Criteria	Support Level	Remarks and Explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	Supports	Upon request, product support documentation shall be made available in other printed or online formats that VMware has available at the time of the request, at no additional charge.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supports	Upon request, product support documentation shall be made available in other printed or online formats that VMware has available at the time of the request, at no additional charge.
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supports	Upon request, product support documentation shall be made available in other printed or online formats that VMware has available at the time of the request, at no additional charge.
