VPAT

Product: Virtual Infrastructure Web Client 2.5
Components covered: Web client, Console control
Contact for more information: <http://www.VMware.com>
Date: December, 2008

Summary of Voluntary Product Accessibility Template		
Criteria	Supporting Features	Remarks and Explanations
Section 1194.21 Software Applications and Operating Systems	Not applicable	
Section 1194.22 Web-based Internet Information and Applications	Supports with Exceptions	Virtual Infrastructure Web Client 2.5 is a web application. Please reference the attached 1194.22 VPAT.
Section 1194.23 Telecommunications Products	Not Applicable	
Section 1194.24 Video and Multimedia Products	Not Applicable	
Section 1194.25 Self-contained, Closed Products	Not Applicable	
Section 1194.26 Desktop and Portable Computers	Not Applicable	
Section 1194.31 Functional Performance Criteria	Supports with Exceptions	Please reference the included 1194.22 and 1194.31 sections.
Section 1194.41 Information, Documentation and Support	Supports	Please reference the included 1194.41 section.

Supporting Features (second column on VPAT)	
Supports	Use this language when you determine the product fully meets the letter and intent of the Criteria.
Supports with Exceptions	Use this language when you determine the product does not fully meet the letter and intent of the Criteria, but provides some level of access relative to the Criteria.

Client Name: VMware	
Product Name: Virtual Infrastructure Web Client 2.5	Date: 11/28/2008

Supports through Equivalent Facilitation	Use this language when you have identified an alternate way to meet the intent of the Criteria or when the product does not fully meet the intent of the Criteria.
Supports when combined with Compatible AT	Use this language when you determine the product fully meets the letter and intent of the Criteria when used in combination with Compatible AT. For example, many software programs can provide speech output when combined with a compatible screen reader (commonly used assistive technology for people who are blind).
Does not Support	Use this language when you determine the product does not meet the letter or intent of the Criteria.
Not Applicable	Use this language when you determine that the Criteria do not apply to the specific product.
Not Applicable - Fundamental Alteration Exception Applies	Use this language when you determine a Fundamental Alteration of the product would be required to meet the Criteria (see the access board standards for the definition of "fundamental alteration").

1194.22 Web-based Internet information and applications

Criteria	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Does not support	Images do not have Alt attributes. Some, such as "Power on" have Title attributes; however, Alt attributes are required.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Not Applicable	Multimedia is not used.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supports with Exceptions	The selected tab is color coded to indicate selection. Otherwise, color is not used as a sole means of conveying information.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Supports with Exceptions	When CSS is disabled, the non-link text names of the graphic buttons appear at the bottom of the page while the functional buttons that are invisible are at the top of the page. Headings do not have heading tags.
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not Applicable	Server-side image maps are not used.
(f) Client-side image maps shall be provided	Not	Client-side image maps are not used.

Client Name: VMware	
Product Name: Virtual Infrastructure Web Client 2.5	Date: 11/28/2008

instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	applicable	
(g) Row and column headers shall be identified for data tables.	Supports	Column headers are identified in data tables.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Not Applicable	Data tables with two or more logical levels are not used.
(i) Frames shall be titled with text that facilitates frame identification and navigation	Does not support	Frames lack Title attributes.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supports	Pages do not cause flickering in the prohibited range.
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	Not Applicable	
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	Supports with exceptions	Interface elements that are clickable, such as the menus "Web Access," "View" and "Virtual Machine" do not have text or other indication to alert screen reader users that they are activatable and should be used to complete a function. In addition, these interface elements are not keyboard accessible.
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	Supports	An plug-in is required for viewing a virtual machine's console. The plug-in is installed automatically.
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Supports with exceptions	Association of text labels to form input controls via explicit labeling is missing in some areas. For example, the Login screen has no explicit labeling. Another example is the Add Hardware Wizard to add a new hard disk, Label tags do exist for the text describing the radio buttons, however, the <i>For</i> attribute is not present to link the label to each radio button. In these instances, screen readers are associating text labels for the input controls based on proximity, which is working but not guaranteed to work.
(o) A method shall be provided that permits users to skip repetitive navigation links.	Does not support	There is no skip navigation mechanism.
(p) When a timed response is required, the	Not Applicable	A timed response is not required.

Client Name: VMware	
Product Name: Virtual Infrastructure Web Client 2.5	Date: 11/28/2008

user shall be alerted and given sufficient time to indicate more time is required.

1194.31 Functional performance criteria

Criteria	Supporting Features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for assistive technology used by people who are blind or visually impaired shall be provided.	Supports with Exceptions	Please refer to 1194.21 and 1194.22.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for assistive technology used by people who are visually impaired shall be provided.	Supports with exceptions	Please refer to 1194.21 and 1194.22.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for assistive technology used by people who are deaf or hard of hearing shall be provided.	Supports	User hearing is not required.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Not Applicable	Audio information is not present.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for assistive technology used by people with disabilities shall be provided.	Supports	User speech is not required.
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Supports with Exceptions	Some items such as menus are not keyboard accessible. Refer to 1194.22 for details.

1194.41 Information, Documentation and Support -Detail

Criteria	Supporting	Remarks and explanations
-----------------	-------------------	---------------------------------

Client Name: VMware	
Product Name: Virtual Infrastructure Web Client 2.5	Date: 11/28/2008

	Features	
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge.	Supports	Upon request, Product support documentation shall be made available in other printed or online formats that VMware has available at the time of the request, at no additional charge.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supports	Upon request, Product support documentation shall be made available in other printed or online formats that VMware has available at the time of the request, at no additional charge.
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supports	Support is available online and via telephone. Deaf or hard of hearing users can use the national relay service to converse with VMWare representatives.
