## VPAT

**Product:** VMWare – View Admin Server 4.5  
**Components covered:** View Admin Server 4.5  
**Contact for more information:** <http://www.VMWare.com>  
**Date:** December 11, 2010

<b>Summary of Voluntary Product Accessibility Template</b>		
<b><i>Criteria</i></b>	<b><i>Supporting Features</i></b>	<b><i>Remarks and Explanations</i></b>
Section 1194.21 Software Applications and Operating Systems	<b>Supports with Exceptions</b>	Please reference the included 1194.21 section.
Section 1194.22 Web-based Internet Information and Applications	<b>Supports with Exceptions</b>	Please reference the included 1194.22 section.
Section 1194.23 Telecommunications Products	<b>Not Applicable</b>	
Section 1194.24 Video and Multimedia Products	<b>Not Applicable</b>	
Section 1194.25 Self-contained, Closed Products	<b>Not Applicable</b>	
Section 1194.26 Desktop and Portable Computers	<b>Not Applicable</b>	
Section 1194.31 Functional Performance Criteria	<b>Supports with Exceptions</b>	Please reference the included 1194.31 section
Section 1194.41 Information, Documentation and Support	<b>Supports</b>	Please reference the included 1194.41 section.

Client Name: VMWare	
Product Name: VMWare – View Admin Server 4.5	Date: 12/11/2010

## Supporting Features (second column on VPAT)

<b>Supports</b>	Use this language when you determine the product fully meets the letter and intent of the Criteria.
<b>Supports with Exceptions</b>	Use this language when you determine the product does not fully meet the letter and intent of the Criteria, but provides some level of access relative to the Criteria.
<b>Supports through Equivalent Facilitation</b>	Use this language when you have identified an alternate way to meet the intent of the Criteria or when the product does not fully meet the intent of the Criteria.
<b>Supports when combined with Compatible AT</b>	Use this language when you determine the product fully meets the letter and intent of the Criteria when used in combination with Compatible AT. For example, many software programs can provide speech output when combined with a compatible screen reader (commonly used assistive technology for people who are blind).
<b>Does not Support</b>	Use this language when you determine the product does not meet the letter or intent of the Criteria.
<b>Not Applicable</b>	Use this language when you determine that the Criteria do not apply to the specific product.
<b>Not Applicable - Fundamental Alteration Exception Applies</b>	Use this language when you determine a Fundamental Alteration of the product would be required to meet the Criteria (see the access board standards for the definition of "fundamental alteration").

<b>1194.21 Software Applications and Operating Systems</b>		
<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	<b>Supports with Exceptions</b>	The Web-based Flash GUI does not allow keyboard access to all screens and all functions.  <i>For example, a user can move from one section of the screen to another but requires the use of a mouse.</i>
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	<b>Does Not Support</b>	The Web-based Flash GUI does not honor or extend any Windows high contrast settings and does not allow large font settings.
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	<b>Supports with Exceptions</b>	The Web-based Flash GUI does not always provide accurate indicators of focus on the current screen.

Client Name: VMWare	
Product Name: VMWare – View Admin Server 4.5	Date: 12/11/2010

(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	<b>Supports with Exceptions</b>	The Web-based Flash GUI does not always present accurate information to the user of Assistive Technology.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	<b>Supports</b>	Bitmap images are used in a consistent manner.
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	<b>Supports with Exceptions</b>	Not all text is displayed as text, some text is displayed as an image and content of the text is not made available to Assistive Technology.
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	<b>Does not Support</b>	The Web-based Flash GUI does not honor or extend all Windows high contrast or large font settings.  <i>See 1194.21(b)</i>
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	<b>Not Applicable</b>	There is no animation in the application.
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	<b>Supports</b>	This product does not use color coding as the only means to convey information, indicating an action, prompting responses or distinguishing visual elements.
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	<b>Not Applicable</b>	The Web-based Flash GUI does not permit a user to adjust color or contrast settings.

Client Name: VMWare	
Product Name: VMWare – View Admin Server 4.5	Date: 12/11/2010

<p>(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.</p>	<p><b>Supports</b></p>	<p>No flashing or blinking text is used in this product.</p>
<p>(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p><b>Supports with Exceptions</b></p>	<p>Some of form fields are accessible but some are lacking the information to make the fields are accessible to Assistive Technology (AT).</p> <p><i>Note: Limitations outlined in 1194.21(a).</i></p>

## 1194.22 Web-based Internet information and applications

<i>Criteria</i>	<i>Supporting Features</i>	<i>Remarks and explanations</i>
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	<b>Supports with Exceptions</b>	Some images do not have alternative text and are not readable with screen readers.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	<b>Not Applicable</b>	There is no multimedia.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	<b>Supports</b>	Color is not used as a sole means of conveying information.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	<b>Not Applicable</b>	The Web-based Flash GUI does not use style sheets.
(e) Redundant text links shall be provided for each active region of a server-side image map.	<b>Not Applicable</b>	View Admin Server 4.5 does not have server-side image maps.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	<b>Not Applicable</b>	View Admin Server 4.5 does not have client-side image maps.
(g) Row and column headers shall be identified for data tables.	<b>Does not Support</b>	Row and column headers of data tables do not have identifying information.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	<b>Not Applicable</b>	Data tables do not have multilevel columns or rows.

Client Name: VMWare	
Product Name: VMWare – View Admin Server 4.5	Date: 12/11/2010

(i) Frames shall be titled with text that facilitates frame identification and navigation.	<b>Not Applicable</b>	View Admin Server 4.5 does not use frames.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	<b>Supports</b>	Pages do not flash or blink.
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	<b>Not Applicable</b>	
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	<b>Does not Support</b>	Assistive technology and keyboard users cannot access scripted Flash interfaces.
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	<b>Does Not Support</b>	The web page where the application is embedded does not provide a link to the Flash player.
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	<b>Supports with Exceptions</b>	Assistive technologies, such as screen readers, may not be able to identify and navigate to all form elements to complete and submit forms.
(o) A method shall be provided that permits users to skip repetitive navigation links.	<b>Does not Support</b>	AT and keyboard users cannot bypass repetitive navigation links.

Client Name: VMWare	
Product Name: VMWare – View Admin Server 4.5	Date: 12/11/2010

(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	<b>Not Applicable</b>	View Admin Server 4.5 does not require timed responses.
---	-----------------------	---

### 1194.31 Functional performance criteria

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for assistive technology used by people who are blind or visually impaired shall be provided.	<b>Supports with Exceptions</b>	Some information retrieval processes and/or operations require vision and may not provide support for assistive technologies.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for assistive technology used by people who are visually impaired shall be provided.	<b>Supports</b>	View Admin Server 4.5 allows persons with less than 20/70 vision to retrieve information and perform product operations through audio, enlarged print output, and/or assistive technologies.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for assistive technology used by people who are deaf or hard of hearing shall be provided.	<b>Supports</b>	User hearing is not required.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	<b>Not Applicable</b>	View Admin Server 4.5 does not have audio information.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for assistive	<b>Supports</b>	User speech is not required.

Client Name: VMWare	
Product Name: VMWare – View Admin Server 4.5	Date: 12/11/2010

technology used by people with disabilities shall be provided.		
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	<b>Supports with Exceptions</b>	While fine motor control is not required, much of the View Admin Server interface is only reachable with a mouse.

<b>1194.41 Information, Documentation and Support -Detail</b>		
<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge.	<b>Supports</b>	Upon request, Product support documentation shall be made available in other printed or online formats that VMWare has available at the time of the request, at no additional charge.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	<b>Supports</b>	Upon request, Product support documentation shall be made available in other printed or online formats that VMWare has available at the time of the request, at no additional charge.
(c) Support services for products shall accommodate the communication needs of end users with disabilities.	<b>Supports</b>	Support is available online and via telephone. Deaf or hard of hearing users can use the national relay service to converse with VMWare representatives.
