

# vShield Endpoint 5.0

## VPAT©

September 30, 2011

## VPAT©

Since the VPAT must be comprehensive, all Section 508 issues on all pages must be corrected to sustain compliance.

Criteria	Supporting Features	Remarks and Explanations
Section 1194.21 Software Applications and Operating Systems	<b>Supports with Exceptions</b>	<a href="#">Please refer to the 1194.21 section for details.</a>
Section 1194.22 Web-based Intranet and Internet Information and Applications	<b>Supports with Exceptions</b>	<a href="#">Please refer to the 1194.22 section for details.</a>
Section 1194.23 Telecommunications Products	Not Applicable	Not Applicable
Section 1194.24 Video and Multi-media Products	Not Applicable	Not Applicable
Section 1194.25 Self-Contained, Closed Products	Not Applicable	Not Applicable
Section 1194.26 Desktop and Portable Computers	Not Applicable	Not Applicable
Section 1194.31 Functional Performance Criteria	<b>Supports with Exceptions</b>	<a href="#">Please refer to the 1194.31 section for details.</a>
Section 1194.41 Information, Documentation, and Support	<b>Supports</b>	<a href="#">Please refer to the 1194.41 section for details.</a>

## Support Levels

Support Level	Description
<b>Supports</b>	Use this language when you determine the product fully meets the letter and intent of the Criteria.
<b>Supports with Exceptions/Minor Exceptions</b>	Use this language when you determine the product does not fully meet the letter and intent of the Criteria, but provides some level of access relative to the Criteria.
<b>Supports through Equivalent Facilitation</b>	Use this language when you have identified an alternate way to meet the intent of the Criteria or when the product does not fully meet the intent of the Criteria.

Support Level	Description
<b>Supports when combined with Compatible AT</b>	Use this language when you determine the product fully meets the letter and intent of the Criteria when used in combination with Compatible Assistive Technology ("AT"). For example, many software programs can provide speech output when combined with a compatible screen reader (commonly used AT for people who are blind).
<b>Does Not Support</b>	Use this language when you determine the product does not meet the letter or intent of the Criteria.
<b>Not Applicable</b>	Use this language when you determine the Criteria does not apply to the specific product.
<b>Not Applicable - Fundamental Alteration Exception Applies</b>	Use this language when you determine a Fundamental Alteration of the product would be required to meet the Criteria (see the access board's standards for the definition of "fundamental alteration").

## §1194.21 Software Applications and Operating Systems

Criteria	Support Level	Remarks and Explanations
<p>(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.</p>	<p><b>Supports with Exceptions</b></p>	<p>Interfaces are keyboard accessible with some exceptions. A mouse or other pointing device is required to reach, activate and/or select. JAWS users cannot activate buttons under “Networking”, options from dropdown menus and subsequent radio buttons in groups. Both JAWS and keyboard-only users cannot activate sort selectors of column headers, accordion interfaces, entries in data tables and “Help” tooltips.</p>
<p>(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.</p>	<p><b>Does Not Support</b></p>	<p>The Flex components of vShield 5.0 cause interference with activated or available accessibility features of other products or operating systems.</p>
<p>(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes. (Related to well-defined focus control which will also be visually indicative).</p>	<p><b>Supports</b></p>	<p>The current focus can be tracked visually or through assistive technologies. For example, JAWS follows focus changes synchronously.</p>

Criteria	Support Level	Remarks and Explanations
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	<b>Supports with Exceptions</b>	Some interfaces and/or graphic components do not have information exposed to assistive technologies. Exceptions include many buttons, all column headers and entries in data tables and accordion interfaces.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	<b>Supports</b>	Images to identify user interfaces and other components have consistent meanings throughout vShield Endpoint 5.0.
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	<b>Supports with Exceptions</b>	vShield Endpoint 5.0 allows textual information to be provided through operating system functions with some exceptions. JAWS does not read the name of any dialog window when it is launched.
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	<b>Does Not Support</b>	vShield Endpoint 5.0 does not honor user-selected display attributes.
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user. (Animation)	<b>Not Applicable</b>	vShield Endpoint 5.0 does not have animation.
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	<b>Supports with Exceptions</b>	vShield Endpoint 5.0 has textual and/or programmatically implemented equivalents when color-conveyed information is displayed to indicate an action, identify an element, or require a response, with some exceptions. Form fields that have errors are in red.

Criteria	Support Level	Remarks and Explanations
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	<b>Not Applicable</b>	vShield Endpoint 5.0 does not have settings to adjust color contrast.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	<b>Supports</b>	vShield Endpoint 5.0 does not have content that flashes or blinks with a frequency greater than 2 Hz and lower than 55 Hz.
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	<b>Supports with Exceptions</b>	Assistive technologies, such as screen readers, may not identify and navigate to all of the form elements in the application to complete and submit forms.

## § 1194.22 Web-based Intranet and Internet Information and Applications

Criteria	Support Level	Remarks and Explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	<b>Supports with Exceptions</b>	Text equivalents for non-text elements are available to comprehend content and to aid in navigation, with some exceptions. Except for graphic interfaces in the Help section, all other graphic interfaces and decorative images do not have text equivalents or have incorrect text equivalents.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	<b>Not Applicable</b>	Webpages do not have multimedia presentations.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	<b>Supports with Exceptions</b>	When color conveys information, text and/or programmatically implemented equivalents are provided, with some exceptions. Exceptions include selected tabs.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	<b>Supports with Exceptions</b>	Webpages are readable when stylesheets are disabled or with user-defined stylesheets, with some exceptions. Headings do not have structural markup.
(e) Redundant text links shall be provided for each active region of a server-side image map.	<b>Not Applicable</b>	vShield Endpoint 5.0 does not have server-side image maps.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	<b>Not Applicable</b>	vShield Endpoint 5.0 does not have client-side image maps.
(g) Row and column headers shall be identified for data tables.	<b>Supports with Exceptions</b>	Row and column headers of data tables have identifying information, with some exceptions. Some column headers do not have structural markup or are in different tables than their associated cells. Some data tables are nested in form elements.

Criteria	Support Level	Remarks and Explanations
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	<b>Not Applicable</b>	vShield Endpoint 5.0 does not have data tables with multi-level columns or rows.
(i) Frames shall be titled with text that facilitates frame identification and navigation	<b>Does Not Support</b>	Title attributes are not provided to help assistive technology users identify and navigate to frames.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	<b>Supports</b>	Webpages do not have content that flashes or blinks with a frequency greater than 2 Hz and lower than 55 Hz.
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	<b>Supports</b>	Text-only pages are provided since compliance cannot be met any other way, or are not required.
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	<b>Supports with Exceptions</b>	Assistive technology and keyboard users can access scripted interfaces, with some exceptions. JAWS and keyboard-only users cannot activate tabs in the Configuration pane, interfaces of popup calendars, accordion interfaces, sort selectors of column headers and "Edit" links within a data table. JAWS users cannot navigate through tree nodes in the Inventory pane.
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a)	<b>Supports</b>	vShield Endpoint 5.0 provides links to accessible applets and/or plug-ins whose files appear on the website.

Criteria	Support Level	Remarks and Explanations
through (l).		
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	<b>Supports with Exceptions</b>	Assistive technologies, such as screen readers, may not identify and navigate to all form elements to complete and submit forms online.
(o) A method shall be provided that permits users to skip repetitive navigation links.	<b>Does Not Support</b>	Assistive Technology and keyboard users cannot bypass repetitive navigation links.
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	<b>Does Not Support</b>	When timed responses are required, the server does not alert users or provide them options for extended time.

*Note to 1194.22: The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5 1999) published by the Web Accessibility Initiative of the World Wide Web Consortium: Paragraph (a) - 1.1, (b) - 1.4, (c) - 2.1, (d) - 6.1, (e) - 1.2, (f) - 9.1, (g) - 5.1, (h) - 5.2, (i) - 12.1, (j) - 7.1, (k) - 11.4.*

## §1194.31 Functional Performance Criteria

Criteria	Support Level	Remarks and Explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	<b>Supports with Exceptions</b>	Some information retrieval processes and/or operations require vision and may not provide support for assistive technologies.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	<b>Supports with Exceptions</b>	Some information retrieval processes and/or operations require vision acuity greater than 20/70 and may not provide support for assistive technologies.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	<b>Supports</b>	vShield Endpoint 5.0 does not require hearing for information retrieval and operations. Support for hearing devices may be provided.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	<b>Not Applicable</b>	vShield Endpoint 5.0 does not have audio information.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	<b>Supports</b>	vShield Endpoint 5.0 does not require speech for information retrieval or operations. Support for assistive technologies may be provided.
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and	<b>Supports with Exceptions</b>	vShield Endpoint 5.0 does not require fine motor control or simultaneous actions. Persons with dexterity impairments can perform product operations, with some exceptions.

Criteria	Support Level	Remarks and Explanations
strength shall be provided.		Exceptions include sort selectors of table column headers, tabs in the Configuration pane, accordion interfaces, a “Refresh” button, interfaces of popup calendars and interfaces within many data tables.

## § 1194.41 Information, Documentation, and Support

Criteria	Support Level	Remarks and Explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	<b>Supports</b>	Upon request, product support documentation shall be made available in other printed or online formats that VMware has available at the time of the request, at no additional charge.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	<b>Supports</b>	Upon request, product support documentation shall be made available in other printed or online formats that VMware has available at the time of the request, at no additional charge.
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	<b>Supports</b>	Upon request, product support documentation shall be made available in other printed or online formats that VMware has available at the time of the request, at no additional charge.
