

VMware Cloud Foundation – Editions	STARTER	STANDARD	ADVANCED	ENTERPRISE
<b>COMPUTE</b>				
Distributed Resource Scheduler	•	•	•	•
Cross-VC vMotion, and Long Distance vMotion	•	•	•	•
High Availability, and Fault Tolerance	•	•	•	•
vSphere Pod service, Storage service, Network service, and Registry service <sup>(1)</sup>		•	•	•
Tanzu Kubernetes Grid Service <sup>(1)</sup>		•	•	•
Tanzu Mission Control <sup>(1)(2)</sup>		•	•	•
<b>STORAGE</b>				
RAID-5/6 Erasure Coding	•	•	•	•
Deduplication & Compression	•	•	•	•
Cloud Native Storage	•	•	•	•
Stretched Cluster with Local Failure Protection				•
Data-at-rest and Data in-transit Encryption				•
File Services				•
HCI Mesh				•
<b>NETWORKING</b>				
Integration with CMP/NSX Cloud	•	•	•	•
VPN (L2-L3)	•	•	•	•
Distributed switching, routing and firewalling	•	•	•	•
Multi-Site & container networking and security	•	•	•	•
Load balancing	•	•	•	•
NSX Distributed IDS/IPS <sup>(3)</sup>	•	•	•	•
Context-Aware Micro-Segmentation (Application Identification, RDSH)				•
HCX Advanced (large scale workload migration)				•
Federation				•
<b>MANAGEMENT</b>				
LOG INSIGHT - Log Analytics	•		•	•
AUTOMATION - Automated lifecycle management			•	•
AUTOMATION – App/Infra Provisioning, Governance			•	•
BUSINESS – Hybrid Cloud Planning, Costing/Showback	•		•	•
NETWORK OPS - Flow Analysis, App Discovery, M-Seg Planning and NSX Day 2 Operations	•		•	•
NETWORK OPS - NW visibility for VMC on AWS, Azure, AWS & Containers; Physical Flow Analysis, ML Analytics				•
OPERATIONS - Performance Optimization; Capacity Management; Compliance	•		•	•
OPERATIONS – Monitoring and Troubleshooting	•		•	•
OPERATIONS - Apps, AWS, Azure, GCP and Container Monitoring			•	•

(1) These features form Tanzu Standard and need to be purchased on top of VCF

(2) Select features of Tanzu Mission Control are included

(3) NSX Distributed IDS/IPS requires an additional subscription
