

6 Must-Haves for a Winning Application Access Strategy

When you give your employees fast, easy access to applications they want and need to do their jobs, your business benefits. Higher productivity. Faster decision making. Positive growth rates. Better recruitment. That's why enterprises adopting modern apps such as Microsoft Office 365 alongside existing applications are choosing VMware Workspace ONE®.

What Is VMware Workspace ONE Access?

6 Critical Application Access Attributes

1 Conditional access and single sign-on (SSO) for all app types

Employees want...	seamless access to all information and apps without administrative hassles
IT wants...	a zero-trust security model that protects sensitive information
Workspace ONE Access delivers both...	higher user satisfaction and stronger security

2 Broker between identity stores and providers

Before	After
Cumbersome management of many solutions from many providers across locations 	Streamlined management and reduced IT burdens with one broker between popular identity stores and providers — onsite and in the cloud One solution: Workspace ONE Access

3 Improved experience with better partnership

SSO for fast application access without reauthentication = More productive and happier employees + fewer password reset calls

Empowered employees plus workspace intelligence = Better IT and business partnership

4 Hosted as a service

Workspace ONE Access hosted in the cloud boosts IT and business agility.

Key advantages:

- Fast initial setup
