

Index

A

- Active Directory, users **29, 32**
- Active Directory domains
 - sync **36**
 - Windows authentication **34**
- Active Directory domain, add to sign in page **37**
- add domains to end user sign in page **37**
- add groups from Active Directory Domains **36**
- add user, Demo User Store **62**
- admin console **17, 20**
- admin console limitations in read only mode **51**
- administrator web sites **20**
- appliance configuration **21**
- appliance configurator, settings **22**
- appliance configurator limitations in read-only mode **51**
- authentication **29, 45**

C

- checklist
 - Active Directory Domain Controller **12**
 - network information, IP Pools **12**
- Chrome **58**
- Citrix resource, configure **29**
- cloned machines, adding IP address **45**
- collect logs **28**
- configuration settings, appliance **21**
- configure
 - logging **27**
 - virtual machines **39**
- connectgor services admin limitations in read-only mode **51**
- connector services admin **20**
- connector-va **43**

D

- data, transfer **25**
- database **11**
- database failover **50**
- demo user store **61**
- deployment
 - checklists **12**
 - preparation **10**
- DNS, TTL Setting **50**
- DNS server redirect **50**
- DNS service location look-up **37**

E

- external database, Configurator **25**
- external access **39**

F

- failover **43, 46**
- failover order for resources **49**
- failover, configure database for **50**
- filter **33**
- filters **33**
- Firefox **58**
- forward DNS **11**

G

- gateway-va **43**
- groups
 - assign groups **64**
 - assign users **64**

H

- hardware
 - ESX **8**
 - requirements **8**
- hznAdminTool, resource failover **49**

I

- identity provider **29**
- importing OVA **48**
- install Workspace **17**
- internal database **17**
- Internet Explorer **57**
- IP Address on cloned machines **45**
- IP Pools **16**

J

- JDBC, change on secondary data center **48**
- join domain
 - kerberos **56**
 - multi-domain Active Directory **35**
 - trust multi-forest Active Directory **35**

K

- Kerberos, configure **56**
