

VMware Learning Platform™ (VLP) is a SaaS platform that gives organizations the ability to deliver hands-on virtual IT training labs to anyone on the planet at cloud scale.

Typical Challenges

-  **Software** is taking over the world and humans need to learn how to use and/or evaluate it as part of their daily jobs.
-  **Isolated IT labs** are in demand to combat increased volume of security and malware remediation and other dev/test activities.
-  **Creating and managing** infrastructure at scale is very difficult and time consuming.

Solution: Learning Platform

01 Platform delivering seamless integration of lesson materials, virtual machines, video, live chat, and social in a unified web-based interface.

02 Universal device access gives end users access to learning modules using any device they choose.

03 Cloud Scale solution means that end user audiences can easily be reached through the Cloud – anywhere around the globe.

VMware Learning Platform™

Cloud Service Brief

vmware®

Key Capabilities

IT On-demand Self-Paced Training: Seamless interactive experience of IT training labs designed for set it and forget it simplicity consumed at the convenience and pace of your students.

IT Instructor Led Training: Scalable IT labs without any of the hassle of managing complex infrastructure.

IT Live Lab Events: Cloud scale large format live lab training events managed with ease and an amazing end-user learning experience.

Software and Hardware Emulation Evaluation and Live Demos: Reduce sales cycles with Demo or proof of concept software and hardware emulation environments that allows for hand-on interaction with your customers.

Isolated IT Labs for Development/Testing and Security and Malware

Remediation/Training: Create isolated replicated lab environments with integrated reference material to improve dev/test deployments and security remediation activities and training.

Dell EMC Education Services leverages VMware's Learning Platform (VLP) as the next-generation cloud portal. At present, they primarily use VLP as a teaching platform for the delivery of on-site and online learning. Dell EMC also leverage the platform for both instructor-led sessions and self-paced eLearning, adding significant value to online learning by integrating hands-on activity for a blended learning experience.
