

VMware Technical Account Manager Service

Improve operations with unparalleled product knowledge

AT A GLANCE

VMware Technical Account Managers (TAMs) provide unrivaled product knowledge and proven skills to help you streamline deployment and improve operations of your VMware platform. Backed by the resources of the entire VMware organization and armed with best practices, TAMs work with you to minimize operational risks and realize business value from your IT transformation.

BENEFITS

- **Avoid common pitfalls** by leveraging lessons learned from thousands of VMware implementations.
- **Ensure high availability and committed performance** with a single point of contact for your technology-related questions and coordination of issue management and problem resolution.
- **Cultivate your staff's knowledge** of VMware technology usage and best practices through customized information sessions and access to VMware product experts.
- **Reduce costs** and maximize the return on your VMware investment by correctly applying automation and standardization across your VMware environment.

HOW WE WORK WITH OUR CUSTOMERS

- We listen, collaborate and execute based on your IT goals
- We set strategic objectives and execute with measurable outcomes
- We ask innovative questions and provide actionable answers
- We imagine new possibilities and deliver unrivaled insight
- We embrace challenges and tackle complexity with rigor
- We transfer knowledge, skills and confidence—enable you to efficiently run and operate your VMware environments

Overview

As your organization standardizes on VMware solutions to propel efficiencies in your IT infrastructure, your Technical Account Manager (TAM) works with you to address the operational considerations required to ensure step-function improvements. Your TAM:

- Acts as primary focal point for technical questions, ideas and hurdles. They provide an inroad to VMware product experts and present your needs for inclusion in future product releases.
- Coordinates your VMware issue management, escalation and resolution, and help you optimize license and professional services credits usage.
- Develops virtualization and cloud computing strategies for a pre-defined set of businesses, geographies, and VMware solutions. They work with you to ensure that your strategies align with the objectives of designated lines of business.
- Creates and reviews with you an executive and customer analytics reports twice a year.
- Coordinates briefings and deep dive sessions with VMware product experts on topics that are pertinent to your environment and objectives. They will also coordinate your participation in roundtables with your peers.

Customer Profile

You should consider the Technical Account Manager Service if:

- Your organization and staff will benefit from a go-to expert to assist with learning VMware technology
- You want to streamline infrastructure operations by best leveraging virtualization or cloud technologies
- You want a single point of contact that can best advocate your needs and identify opportunities for better exploitation of VMware technology
- You want assistance developing strategies and internally communicating the value of your virtualized and cloud computing investments
- You seek prescriptive, real-time guidance that enables you to avoid common pitfalls and manage complexity
