A fully managed VMware Cloud service that provides a simple, secure, and scalable VMware Cloud infrastructure for customer's on-premises datacenter and edge locations. [Learn more](#)

As IT organizations continue to embrace the public cloud and Software-as-a-Service operating models, analysts continue to forecast rapid growth in hybrid cloud and public cloud migration. According to Hybrid Cloud Trends survey conducted by Enterprise Strategy Group in 2019, 93% of organizations are committed to or interested in hybrid cloud strategies.

Now, customers can start their hybrid cloud journey with VMware Cloud Universal™ program. It is a flexible subscription for multi cloud that delivers credits for VMware Cloud infrastructure and management (and related extensions) across a customer managed private cloud (VMware Cloud Foundation subscription), VMware managed local cloud (VMware Cloud on Dell EMC), or a VMware managed public cloud (VMware Cloud on AWS). VMware Cloud Universal also includes VMware Success 360 - VMware's premier customer success program. VMware Cloud Universal credits can also be deployed against VMware vRealize Cloud for management of previous VMware infrastructure investments.

Use case and scenarios

Hybrid Cloud Architecture - Future-proofed hybrid cloud investments

VMware Cloud Universal program is ideal for customers who has tactical or strategic requirements for supporting workloads across both on-premises infrastructure and in the public cloud. VMware Cloud Universal enables customers to build and maintain a hybrid cloud architecture across on-premises and the cloud infrastructure over time. Example scenarios include:

Balancing investments across on-premises and the public cloud over time

Flexibly running apps in the right environment that suits each application's needs

Handling unplanned or urgent business needs on-premises or in the cloud (e.g., remote workforce, new LoB apps, M&A integrations, post-divestiture infrastructure, burst capacity in the cloud to handle seasonal spikes in demand)

What VMware Cloud Universal delivers

- 1. Wide range of subscription options:** VMware Cloud Universal SPP credits can be redeemed for one-year or three-year subscriptions of any eligible product within the program.
- 2. Flexibility within the program:** Customers have the option to adjust spend & workloads across customer managed private cloud, VMware managed local cloud, and VMware managed public cloud
- 3. Cloud acceleration benefits:** Customers with existing vSphere, NSX, vSAN, or vRealize perpetual licenses can receive discounts for upgrading to VMware Cloud Universal, including credit for unused SnS.
