

VMware Subscription Upgrade Program

Program Guide

Last updated: 05 October 2023

Overview

The VMware Subscription Upgrade Program (“SUP”) is designed to incentivize VMware customers to upgrade their existing perpetual licenses and on-premises workloads to subscriptions for eligible on-premises or hosted offerings (“SUP offerings”) by providing discounted pricing on Customer’s initial purchase of subscriptions to the SUP offerings. The program is only available to customers that have existing eligible perpetual licenses, and that want to purchase entitlements to “matching” on-premises and hosted offerings. (See the tables, below, for eligible perpetual and SUP offerings.)

- For each subscription purchased through SUP, Customer must (i) own a corresponding perpetual license from which to upgrade, and (ii) have an active support and subscription services (“SnS”) contract for that perpetual license.
- By participating in SUP, Customer agrees that it will not renew SnS for the perpetual license used for the upgrade. (The then-current active SnS contract will expire at the end of its stated term.)
- After purchasing a subscription to a SUP offering, Customer may continue to deploy and use the perpetual license(s) used for the SUP upgrade, unless otherwise agreed with VMware. (See the “Software destruction” section, below.) The customer will be eligible for support for the perpetual licenses for up to ninety (90) days after SnS contract has expired.
- Customer may only use a perpetual license to upgrade through SUP once; multiple upgrades using the same license are not permitted.
- The discounted pricing for subscriptions to the SUP offerings is only applicable to Customer’s initial purchase of entitlements to the SUP offerings. Renewal pricing may differ and will be applied to all capacity covered by the entitlement.
- Customer may transfer or assign any perpetual licenses that Customer has utilized for SUP, including but not limited to assignment in the event of a merger or acquisition, but those licenses will be subject to the restrictions imposed pursuant to SUP; for clarity, these licenses will not be eligible for SnS, and they cannot be used for a further SUP upgrade.
- Some licenses acquired via specific channels may not be eligible for SUP. Consult a VMware sales representative for details.
- Some SUP offerings may have service-specific terms or conditions (e.g., installation of appliances, etc.); these are addressed in the applicable sections of the Cloud Services Guide (found [here](#)).

Program Mechanics

SUP is for customers upgrading from perpetual licenses to subscriptions for SUP offerings within the same product category. (See the tables, below, for the eligible offerings.)

SUP has a three-step process: first, VMware will review the customer’s existing installed base of perpetual licenses and associated active SnS contracts to determine if the customer is eligible for SUP (that is, does the customer have the appropriate perpetual licenses, with active SnS contracts for each license); second, the customer purchases subscriptions to the eligible SUP offerings with (discounted) upgrade pricing; and third, the applicable

perpetual licenses are annotated in VMware's system to document that they are no longer eligible for SnS after expiration of the then-current SnS contract.

Software Destruction

In certain SUP transactions, if agreed between VMware and the customer, the customer will be obligated to surrender the perpetual licenses that are being used for the upgrade through SUP. The following conditions will also apply to these transactions:

- The customer is required to identify, either in the body of a VMware Enterprise Order, or in a standalone Software Destruction Agreement (collectively, "SDA"), the specific perpetual licenses that are being surrendered through SUP.
- The customer may continue to use those surrendered perpetual licenses for up to ninety (90) days after the customer has purchased the SUP offering entitlements ("Migration Period"). After the Migration Period, the customer must not use any of the surrendered perpetual licenses, and VMware will invalidate the related license keys.
- Customers are not required to uninstall any perpetual license software under the surrendered licenses, if the new on-premises SUP offering can leverage that installation. If the customer's existing installed on-premises software cannot be used with the SUP offering software, then the customer must promptly cease use of and delete the previously installed software.
- For the SUP deals where customers surrender the relevant perpetual licenses, customers may receive a credit to be applied to the initial purchase of the SUP offerings (no cash refund) for the prepaid, unused SnS balance associated with the surrendered perpetual licenses, which will be calculated from the date that the customer surrenders the perpetual licenses.

Eligible Offerings

The perpetual license products that are eligible for SUP and the matching eligible destination on-premises and hosted offerings are listed below. The offering descriptions are simplified to show full editions (no applications, add-ons, federal or academic eligible offerings). These tables are correct as of the date of this Program Guide; VMware reserves the right to modify any table at any time, and those modifications will be effective as of the date published.

Product Category	Source	Destination (SaaS or Convertible)
vSphere	VMware vSphere 7 or 8 Standard for 1 processor	VMware vSphere+ Standard – 1/3/5 Year Prepaid Commit Subscription - Per Core
