BarrierBreak performed an accessibility audit for Telecom Sampler.

Evaluation Methods Used:

A sample set of 3 screens were selected to perform the audit. The screens were tested with TalkBack on Android 8.1. Accessibility testers performed the audit using automated tools such as Emulator, keyboard-only interaction, and screen readers (TalkBack). Accessibility testers performed the test using color contrast checkers keeping WCAG 2.1 guidelines in mind.

These results reflect the accessibility of a sample set of screens. The following screens of the application were evaluated:

- Home
- About
- Check Latest Samples Sent Screen
