

## VMware Workstation 11.1 General Help VPAT©

June 2015

Since the VPAT must be comprehensive, all Section 508 issues on all pages must be corrected to sustain compliance.

Criteria	Supporting Features	Remarks and Explanations
Section 1194.21 Software Applications and Operating Systems	Not Applicable	Not Applicable
Section 1194.22 Web-based Intranet and Internet Information and Applications	<b>Supports with Exceptions</b>	<a href="#">Please refer to the 1194.22 section for details.</a>
Section 1194.23 Telecommunications Products	Not Applicable	Not Applicable
Section 1194.24 Video and Multi-media Products	Not Applicable	Not Applicable
Section 1194.25 Self-Contained, Closed Products	Not Applicable	Not Applicable
Section 1194.26 Desktop and Portable Computers	Not Applicable	Not Applicable
Section 1194.31 Functional Performance Criteria	<b>Supports with Exceptions</b>	<a href="#">Please refer to the 1194.31 section for details.</a>
Section 1194.41 Information, Documentation, and Support	<b>Supports</b>	<a href="#">Please refer to the 1194.41 section for details.</a>

## Support Levels

Support Level	Description
<b>Supports</b>	The product fully meets the letter and intent of the Criteria.
<b>Supports with Exceptions/Minor Exceptions</b>	The product does not fully meet the letter and intent of the Criteria, but provides some level of access relative to the Criteria.
<b>Supports through Equivalent Facilitation</b>	The accessibility tester identified an alternate way to meet the intent of the Criteria or the product does not fully meet the intent of the Criteria.
<b>Supports when combined with Compatible AT</b>	The product fully meets the letter and intent of the Criteria when used in combination with Compatible Assistive Technology (AT). For example, many software programs can provide speech output when combined with a compatible screen reader, commonly used AT for people who are blind.
<b>Does Not Support</b>	The product does not meet the letter or intent of the Criteria.
<b>Not Applicable</b>	The Criteria does not apply to the specific product.
<b>Not Applicable - Fundamental Alteration Exception Applies</b>	A Fundamental Alteration of the product would be required to meet the Criteria (see the access board's standards for the definition of "fundamental alteration").

## § 1194.22 Web-based Intranet and Internet Information and Applications

Criteria	Support Level	Remarks and Explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	<b>Supports with Exceptions</b>	The currently selected tab in the navigation tree is obvious visually, but there is no textual alternative conveying this information.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	<b>Not Applicable</b>	VMware Workstation Help does not use multimedia.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	<b>Supports with Minor Exceptions</b>	In its inactive state, the "Previous" button changes color, but does not provide a textual equivalent of this information.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	<b>Supports</b>	The help pages can be read with style sheets disabled. Headings and lists have HTML markup.
(e) Redundant text links shall be provided for each active region of a server-side image map.	<b>Not Applicable</b>	Server-side image maps are not used.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	<b>Not Applicable</b>	Client-side image maps are not used.
(g) Row and column headers shall be identified for data tables.	<b>Does Not Support</b>	Explicit row and column headers are not identified in data tables.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	<b>Not Applicable</b>	Data tables do not have multilevel columns or rows.
(i) Frames shall be titled with text that facilitates frame identification and navigation	<b>Does Not Support</b>	Frames are used without meaningful titles.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	<b>Supports</b>	Pages do not flash or blink.
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the	<b>Supports</b>	VMware Workstation Help is primarily text based.

Criteria	Support Level	Remarks and Explanations
text-only page shall be updated whenever the primary page changes.		
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	<b>Supports with Exceptions</b>	Some elements such as expand/collapse elements in the navigation tree do not include textual equivalents to indicate their expanded or collapsed state.
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	<b>Not Applicable</b>	Plug-ins are not used.
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	<b>Supports with Exceptions</b>	Not all form fields are fully accessible to assistive technology. For example, under the Search tab, the Search field is not labeled; therefore, users are unable to tell what should be entered. Users can identify it as a form field, but the label does not exist to tell users what to enter in the field, thereby leaving them to infer the field's purpose from context.
(o) A method shall be provided that permits users to skip repetitive navigation links.	<b>Does Not Support</b>	There are navigation tabs on the screen presented to users; however, there is no accessible skip mechanism to take users to the main content.
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	<b>Not Applicable</b>	Timed responses are not required.

## §1194.31 Functional Performance Criteria

Criteria	Support Level	Remarks and Explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	<b>Supports with Exceptions</b>	<a href="#">Please refer to 1194.22 for details.</a>
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	<b>Supports with Minor Exceptions</b>	<p>The vast majority of content within Workstation 11.1 General Help will be accessible to users with low vision or users of screen magnification software.</p> <p>However, a few minor color contrast issues are present in the breadcrumbs and footer content. Additionally, fixed frame heights may pose problems for some users.</p>
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	<b>Supports</b>	VMware Workstation does not require the use of audio.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	<b>Supports</b>	VMware Workstation does not require the use of audio.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	<b>Supports</b>	User speech is not required.
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and	<b>Supports</b>	Fine motor control is not required to use the application.

Criteria	Support Level	Remarks and Explanations
strength shall be provided.		

## § 1194.41 Information, Documentation, and Support

Criteria	Support Level	Remarks and Explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	<b>Supports</b>	Upon request, product support documentation shall be made available in other printed or online formats that VMware has available at the time of the request, at no additional charge.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	<b>Supports</b>	Upon request, product support documentation shall be made available in other printed or online formats that VMware has available at the time of the request, at no additional charge.
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	<b>Supports</b>	Upon request, product support documentation shall be made available in other printed or online formats that VMware has available at the time of the request, at no additional charge.
