

VMWARE vREALIZE FAMILY OF PRODUCTS

Understanding Suites and Stand Alone Offerings

vRealize Product Portfolio

Q. What is vCloud Suite?

A. VMware vCloud Suite is an integrated offering that brings together VMware's industry-leading vSphere hypervisor and VMware vRealize Suite multi-vendor hybrid cloud management platform.

- vRealize Suite: VMware vRealize Suite is a comprehensive cloud management platform that enables IT to quickly deliver infrastructure and applications, without sacrificing the control IT requires
- vSphere: VMware's industry-leading server virtualization platform enables IT to efficiently allocate application workloads to the most cost-effective compute resource available

Q. What is included in vRealize Suite?

A. VMware vRealize Suite delivers an enterprise proven hybrid cloud management platform which includes the following component products:

- vRealize Automation™: Automates delivery of personalized infrastructure, applications and custom IT services
- vRealize Operations™: Enables intelligent operations from applications to infrastructure to help organizations plan manage and scale their SDDC
- vRealize Log Insight™: Provides Real time log management and log analysis.
- vRealize Business for Cloud™: Automates costing, usage metering, and service pricing of virtualized infrastructure

Q. What are the Stand Alone vRealize Offerings?

A. The Standalone Offerings are:

- vRealize Automation™: See above
- vRealize Operations™: See above
- vRealize Log Insight™: See above

- vRealize Business for Cloud™: See above
- vRealize Network Insight™: Delivers intelligent operations for software-defined *networking* and security accelerating micro-segmentation and visibility across virtual and physical networks
- vRealize Code Stream™: Provides release automation and continuous delivery to enable frequent, reliable software releases while reducing operational risks

Q. What are the Free Products?

A. vRealize Orchestrator™: Simplifies the automation of complex IT tasks to improve efficiency, management and IT agility. It is Integrated with vRealize Suite and vCloud Suite and bundled into vCenter server

Q. Which Products are no longer actively sold?

A. The products not actively sold are:

- vFabric Data Director™: VMware vFabric Data Director is a software solution that provides DBaaS for your cloud. This was part of vFabric family. Most of the functionality of this solution is superseded by vRealize Automation
- vRealize Air Compliance™ is a low friction compliance engine that helped discover, measure and manage the compliance of your infrastructure in real-time. vRealize Air Compliance is EOL

VMWARE vREALIZE FAMILY OF PRODUCTS

Understanding Suites and Stand Alone Offerings

Q. Which Products are no longer offered Stand Alone?

A. The products no longer offered Stand Alone are:

- Answer Hyperic™: This was available for sale standalone and was also included as part of vRealize Operations. Replaced within vRealize Operations by Endpoint Operations Management that gathers operating system metrics to monitor availability of remote platforms and applications
- vRealize Configuration Manager™: Automates critical configuration and compliance management tasks. It is only included in vRealize Operations Standalone
