

VMWARE vREALIZE SUITE LIFECYCLE MANAGER

VMware Cloud Management Platform

vRealize Suite delivers a comprehensive cloud management platform that enables a highly agile and efficient hybrid cloud environment across on-premises software-defined data centers (SDDC) and public clouds. The suite includes the following component products:

- **VMware vRealize Automation™:** Automate IT service delivery processes (infrastructure, containers, applications, and any custom IT service) to rapidly respond to business needs.
- **VMware vRealize Operations™:** Enable intelligent operations from applications to infrastructure to help organizations plan, manage and scale their SDDC and multi-cloud environments.
- **VMware vRealize Log Insight™:** Provide real-time log management and log analysis for deep operational visibility and fast troubleshooting across hybrid cloud environment.
- **VMware vRealize Business™ for Cloud:** Provide cost visibility through automated hybrid costing analysis, consumption metering, cloud comparison, and planning capabilities.

AT A GLANCE

VMware vRealize® Suite Lifecycle Manager™ is designed to streamline and simplify the deployment and on-going management of the vRealize product portfolio, throughout the product life cycle. vRealize Suite Lifecycle Manager relieves IT teams of day-to-day admin tasks by accelerating product installation and deployment, simplifying on-going management and configuration, and enabling best practice-based implementation. Through vRealize Suite Lifecycle Manager, IT organizations can maximize the benefits delivered by vRealize products by reducing the time and effort invested.

The Best Way to Manage Your vRealize Suite

vRealize Suite Lifecycle Manager helps organizations speed up initial deployments, minimize admin tasks of on-going product management and ensure best practices at the same time. Whether you choose to use individual product or different suite editions, always start with vRealize Suite Lifecycle Manager to maximize the benefit of vRealize product portfolio by reducing the time and effort invested.

KEY BENEFITS

- Accelerate time-to-value: Simplify the deployment and upgrade process with automated pre-checks and validation.
- Minimize on-going management: Automate configuration and drift management with health monitoring across the vRealize product portfolio.
- Apply DevOps principles: Enable automated infrastructure content management and easy collaboration with pre-built content pipelines.
- Enable best practice: Enforce alignment with VMware recommended reference architecture and validated design.

LEARN MORE

vRealize Suite Lifecycle Manager is available as part of VMware vRealize Suite Standard, Advanced and Enterprise editions.

What Does vRealize Suite Lifecycle Manager Deliver?

- **Rapid Installation:** Simple and flexible deployment model with product and solution based installation supported. Automated environment replication and validation process.
- **Easy Ongoing Management:** Automated configuration management and drift management with health monitoring capabilities.
- **One-Click Upgrade:** Simplified upgrade and patching process with environment snapshot function.
- **DevOps for Infrastructure Contents:** Out-of-the-box pipelines automate the capture, version control, testing and deployment of vRealize contents across multiple users and different environments.
- **In-Product Marketplace:** Integration with VMware Solution Exchange (VSX) marketplace enables easy access and consumption of curated contents and out-of-the-box building blocks provided by VMware and ecosystem partners.
- **Best Practice Implementation:** Easy alignment with VMware recommended reference architecture and validated design (VVD) through pre-defined settings.
