An open, extensible cloud management platform to get you on the right track.

Mitigate risk: VMware delivers continuous performance optimization

Only VMware delivers smart automation to ensure performance at minimal cost. Be confident that your critical applications have the resources they need to run at peak performance.

Unlike the competition, VMware delivers:

- Click here to try the vRealize ROI calculator today and see how much you can save!

Taking the cloud management express train to greater business value

Count on vRealize to transport your critical application infrastructure safely and efficiently to accelerate the actions of your business.

Enterprise troubleshooting: staying on the right track

VMware provides the transparency and visibility that lets you resolve problems faster and more efficiently.

Unlike the competition, VMware delivers:

- 50% faster root cause analysis
- 90% reduction in time spent reviewing logs
- 70% reduction in manual tasks
- 75% reduction in unplanned downtime

An open, extensible cloud management platform to get you on the right track.

VMware Cloud on AWS

Multi-cloud management, including VMware Cloud on AWS

Unlike the competition, VMware delivers:

- "VMware provided the most complete solution that was really built for the cloud era, versus other solutions that may have been retrofitted for cloud."
  — Michael Lebiedzinski, Director of Private Cloud Engineering, Covance

vRealize Suite: don’t pay for individual trips—get the full pass

Only VMware delivers a solution that provides all the features and functionality you need in one platform, saving you money over the costs of individual tools.

Unlike the competition, VMware delivers:

- ROI of 119%
- 9x fewer migrations to achieve balance
- NPV of $1.4M
- Payback in 3 months

VMware delivers real-time and predictive capacity management and cost insights for optimal densification and proactive planning and procurement.

Unlike the competition, VMware delivers:

- 54% improvement in application uptime
- 80% up to reclaimed capacity
- 30% optimized utilization, with improved workload placement, troubleshooting, and capacity planning

"For the first time ever, we’re able to capacity plan, to look ahead and forecast what we’re going to need for the next one, three, or five years."
  — Ricky Caldwell, Director of Server Operations, Architecture, and Infrastructure, Cornerstone
